GeotechIE report

The 126th OGC Member Meeting

Hosted by

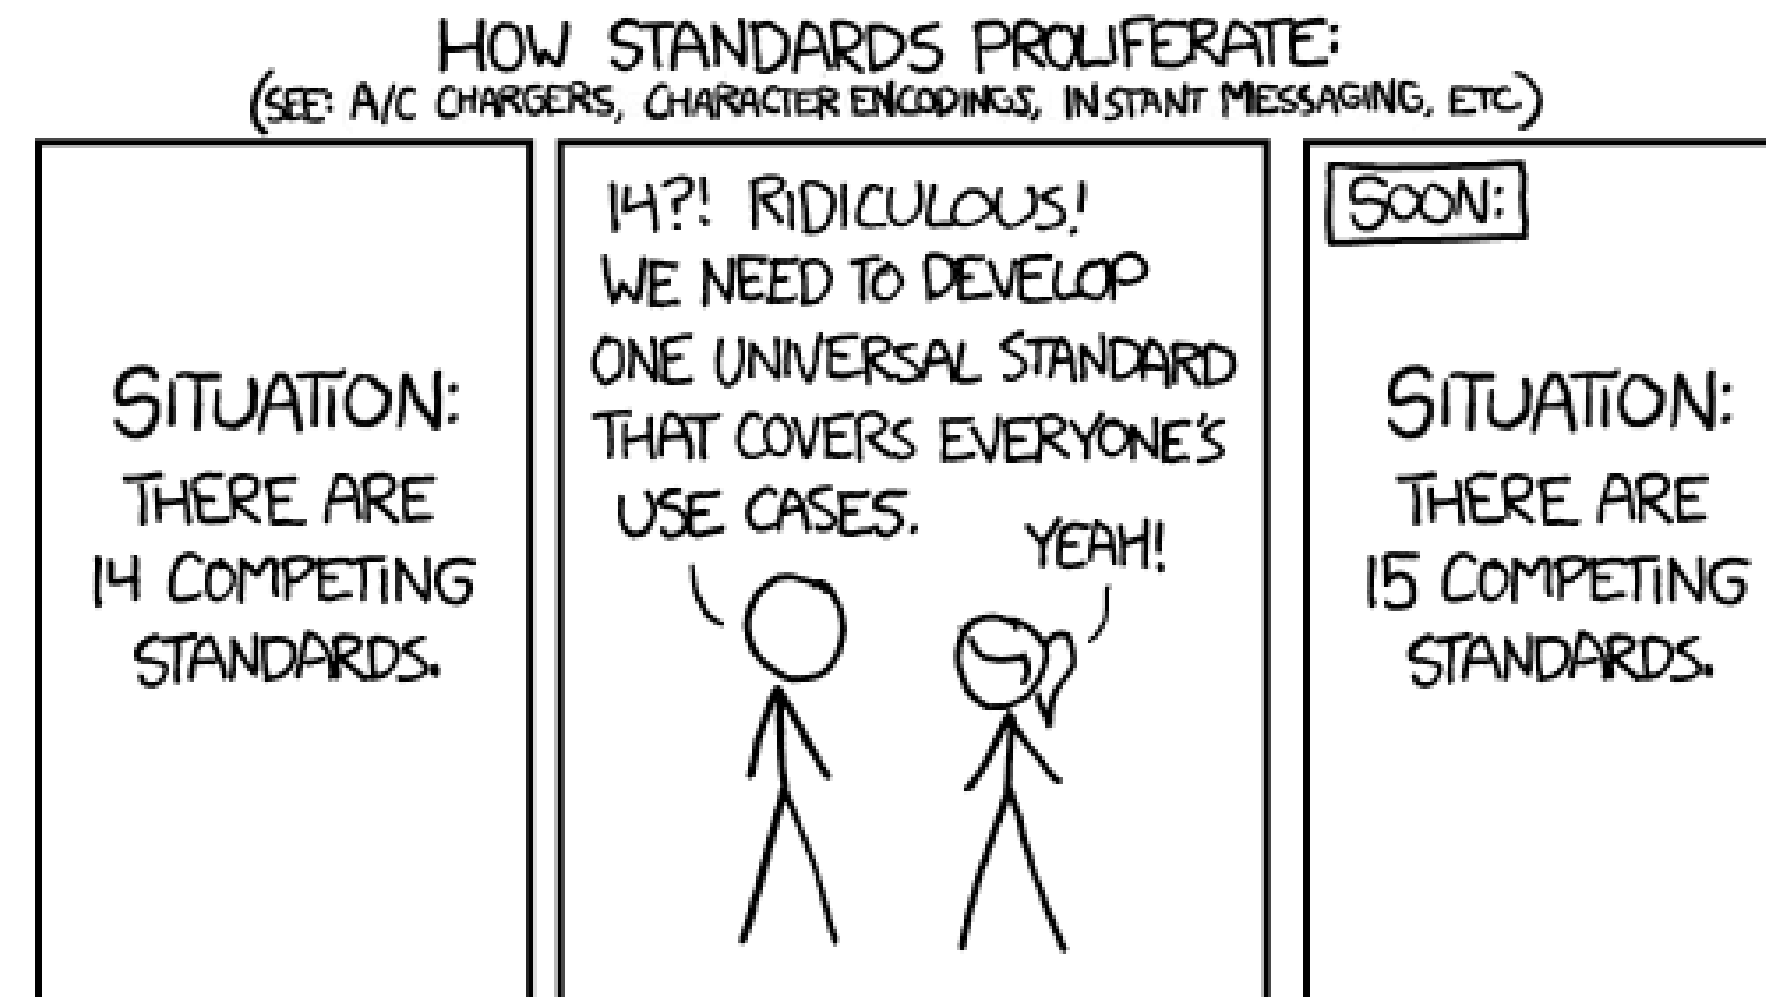

GEO|HUNTSVILLE

Mickael Beaufils, BRGM
7 June 2023

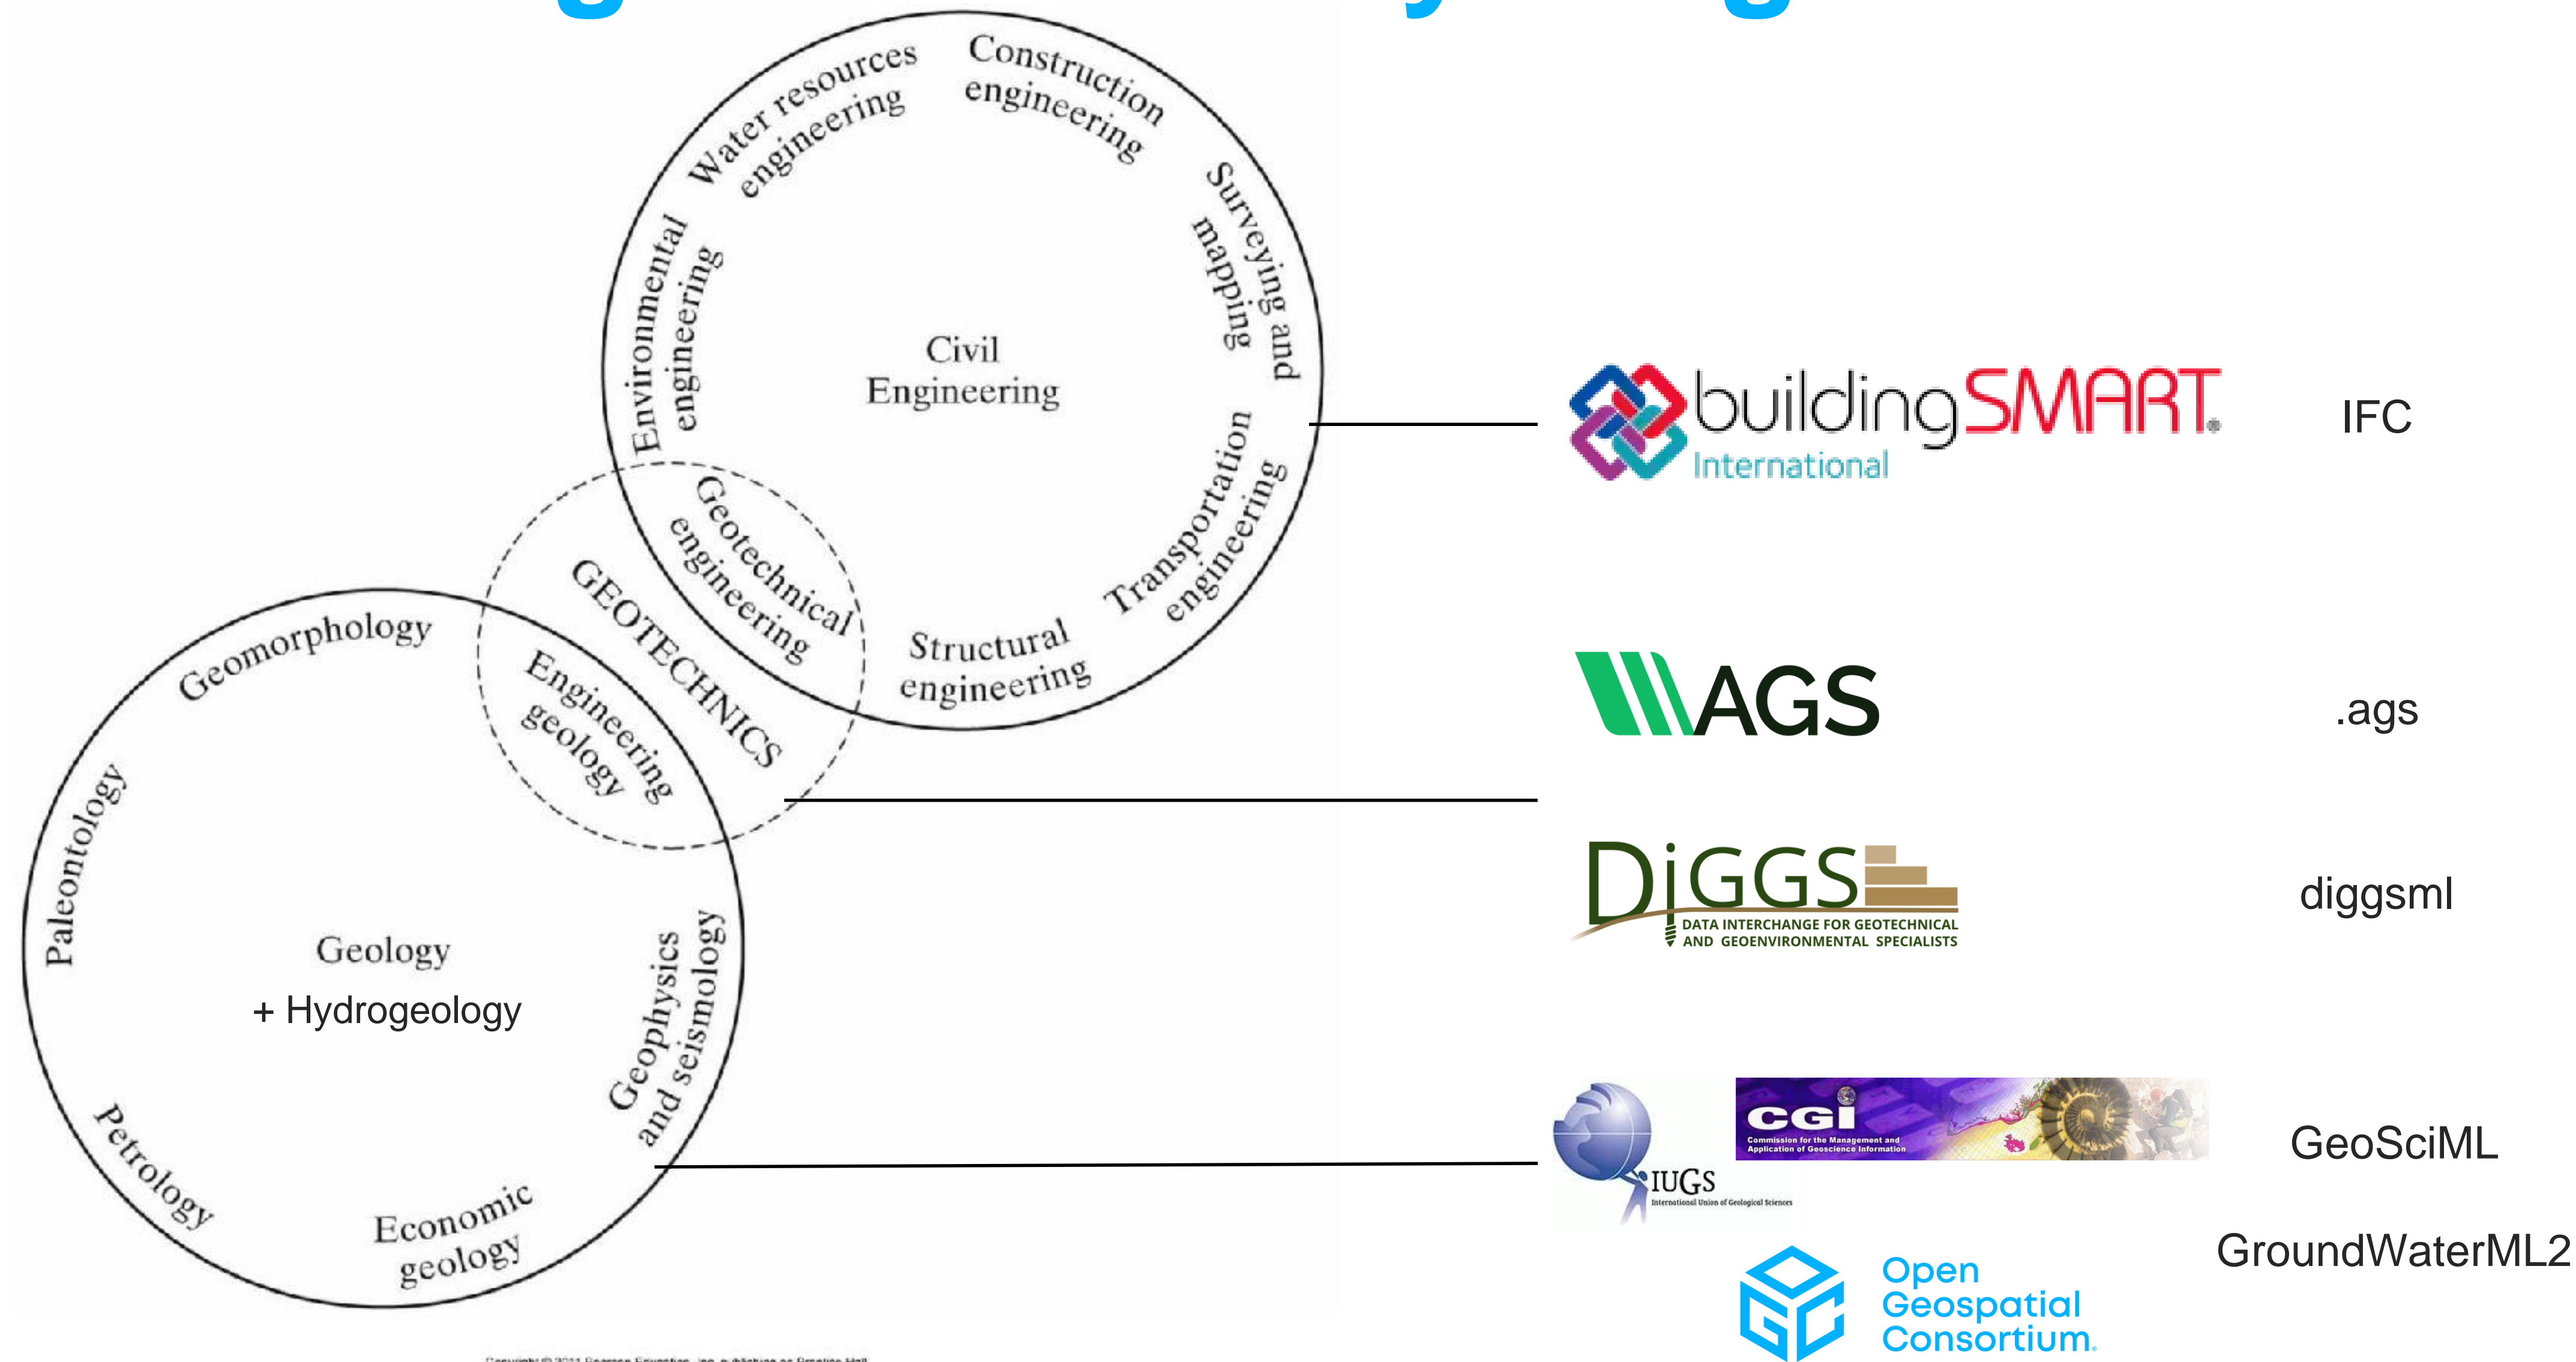

What is the Geotech Interoperability Experiment?

- An effort to federate the geotechnical community around standards
 - Enhance existing standards / Highlight complementarity

- An activity lead by the OGC Geoscience DWG (second IE after Borehole IE)
 - Started on February 2022
 - Estimated end in summer 2023

Motivation: Digital continuity for geotech

NB: Non exhaustive list of existing formats and standards

Geotech IE objectives and Work Packages

Community oriented goals

- Contribute to federate the geotechnical community around a common position / proposal for geotechnical data,
 - Scientific – IT connection
 - BIM – GIS and more connection
 - Users – Solution providers connection

Work packages:

- #1: Common conceptual model
- #4a: White paper
- #4b: Technical paper
- #5: Implementation Guide for Software Vendors

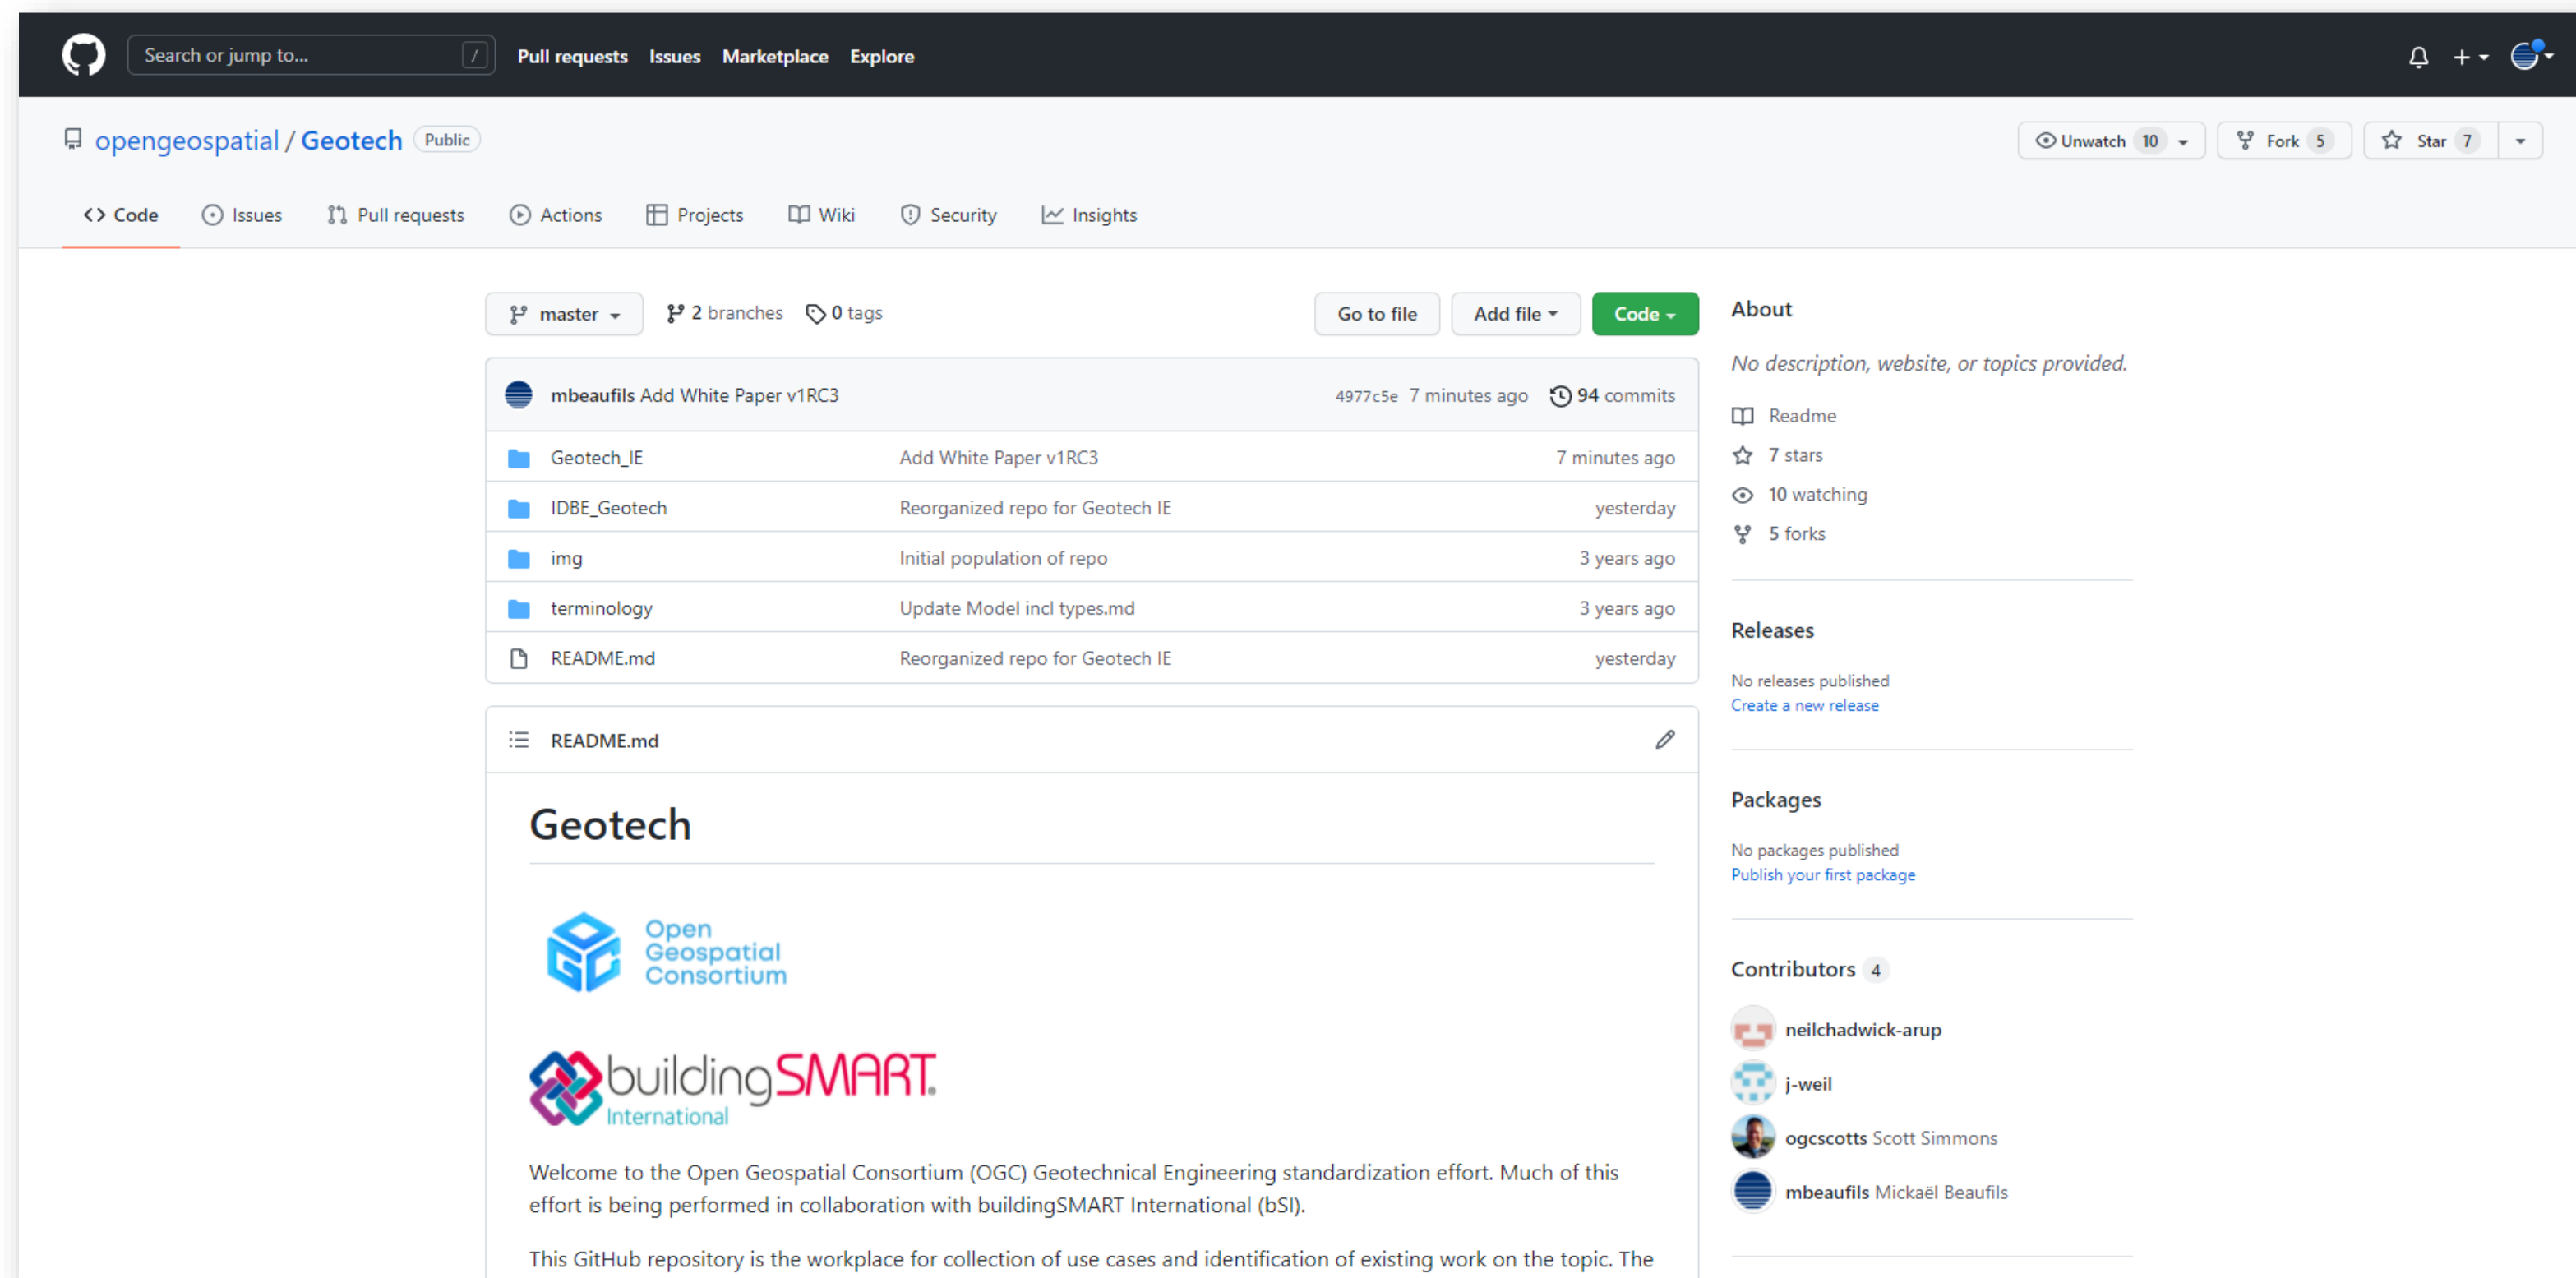

Technical oriented goals

- Propose effective solutions to enable digital continuity between GIS and BIM

Work packages:

- #2: Extension of OGC Geoscience standards,
- #3: Technical documentation on the use of OGC APIs
- #3bis: Implementation forum

Work organization – “Workspace”

- Mail list:
geotech.ie@lists.ogc.org
- GitHub:
<https://github.com/opengeospatial/Geotech>
- Wiki:
<https://github.com/opengeospatial/Geotech/wiki>

Focus of today

Community oriented goals

- Contribute to federate the geotechnical community around a common position / proposal for geotechnical data,
 - Scientific – IT connection
 - BIM – GIS and more connection
 - Users – Solution providers connection

Work packages:

- #1: Common conceptual model
- #4a: White paper
- #4b: Technical paper
- #5: Implementation Guide for Software Vendors

Technical oriented goals

- Propose effective solutions to enable digital continuity between GIS and BIM

Work packages:

- #2: Extension of OGC Geoscience standards,
- #3: Technical documentation on the use of OGC APIs
 - #3bis: Implementation forum

#1: Contents of each book

(based on current discussion and cover intentions by the standards / formats)

	Objects	Associated properties
Book A: Investigations    	Observation Supports or Sampling Features Borehole, Material Sample, Trial Pit, Observed Zone	Observations and measurements In-situ tests Laboratory tests Monitoring
Book B: Models and interpretations   	Models and their (possible) components GeologicUnit, Fault, Contact, Fold HydrogeologicUnit, FluidBody, FluidBodySurface, WaterBody GeotechnicalUnit, Discontinuity, Void HazardArea GeophysicalUnit?	Interpretations
Book C: Design solution  	GeotechSynthesis Model Alignment, TypicalDesignArea, GeotechnicalZoneOfInfluence	Interpretations / Projections

* partial cover

Proposed OGC APIs for Geotech

	Objects	Associated properties
<div>Book A</div> <div></div>	<div>Observation Supports or Sampling Features</div> <div>Borehole, Material Sample, Trial Pit, Observed Zone</div>	<div>Observations and measurements</div> <div>In-situ tests Laboratory tests Monitoring</div>
<div>Book B</div> <div></div>	<div>Models and their (possible) components</div> <div>GeologicUnit, Fault, Contact, Fold HydrogeologicUnit, FluidBody, FluidBodySurface, WaterBody GeotechnicalUnit, Discontinuity, Void HazardArea GeophysicalUnit?</div>	<div>Interpretations</div>
<div>Book C</div> <div></div>	<div>GeotechSynthesis Model</div> <div>Alignment, TypicalDesignArea, GeotechnicalZoneOfInfluence</div>	<div>Interpretations / Projections</div>

Served with:

OGC API Feature

OGC SensorThingsAPI

Implementation test

	Objects	Associated properties

OGC API Feature

OGC SensorThingsAPI

About OGC API Features and SensorThingsAPI

- Already existing material
 - API for INSPIRE
 - Studying the fitness of OGC API Features and SensorThings API as an INSPIRE Download service
- To be extended with geotech examples

<https://joinup.ec.europa.eu/collection/elise-european-location-interoperability-solutions-e-government/api-inspire>

The borehole data journey to STA

- **Conceptual model:**

- the conceptual alignment between ISO19148 (Linear Referencing) and ISO19156 (OMS) for the description of borehole data,

- **Logical / Physical model:**

- adaptation of the SensorThingsAPI data model for the provision of borehole data

- Application to some Geotech tests (CPT, SPT, Menard Pressuremeter),

- **Implementation level:**

- the provision of a tuned FROST (Fraunhofer SensorThings API server) that implement this data model.

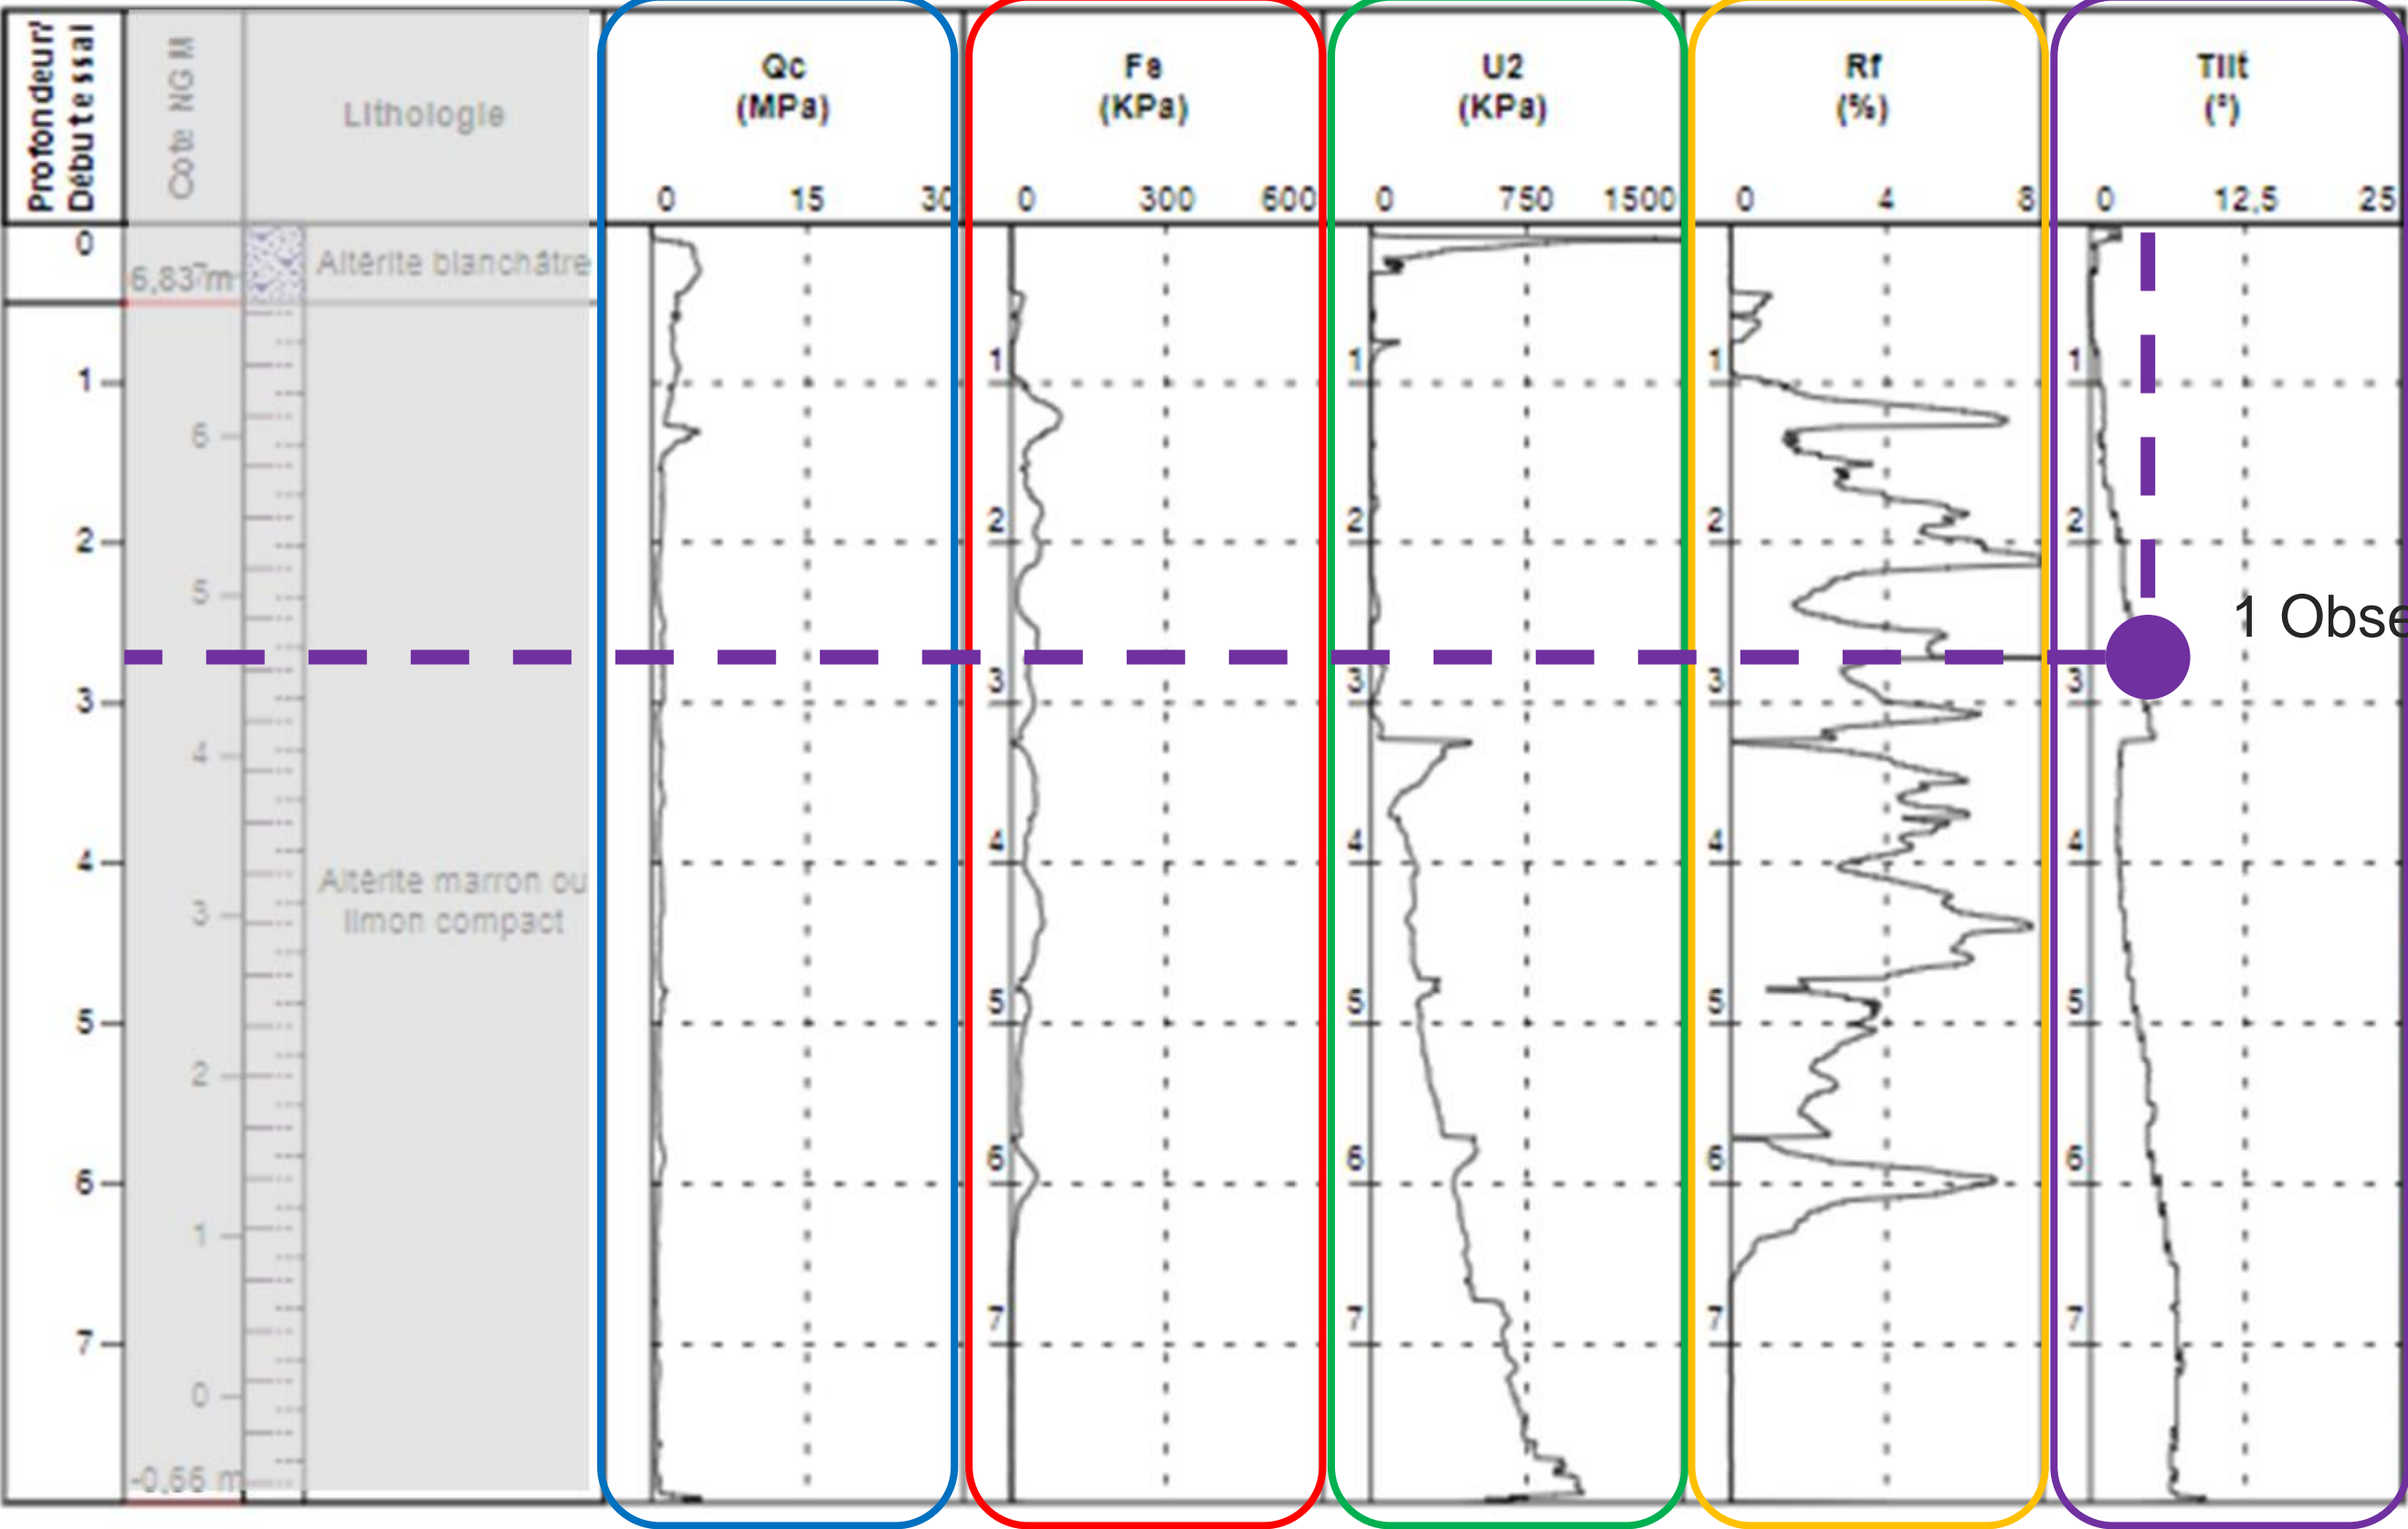

Sharing borehole logs

Some data about the test

	CHIRONGUI			Chantier N° : M18-24	
	Client : VICE RECTORAT - DEAL				
	Date début : 25/10/2018	Cote NGR : 7.33	Profondeur : 0,00 - 7,99 m		
	Date fin : 25/10/2018	Machine : PAGANI 73-200	X	: 515 963.07	
			Y	: 8 569 727.02	
1/75	Forage : P22-2			EXGTE 3.19/LB2EPF567FR	

At different depths

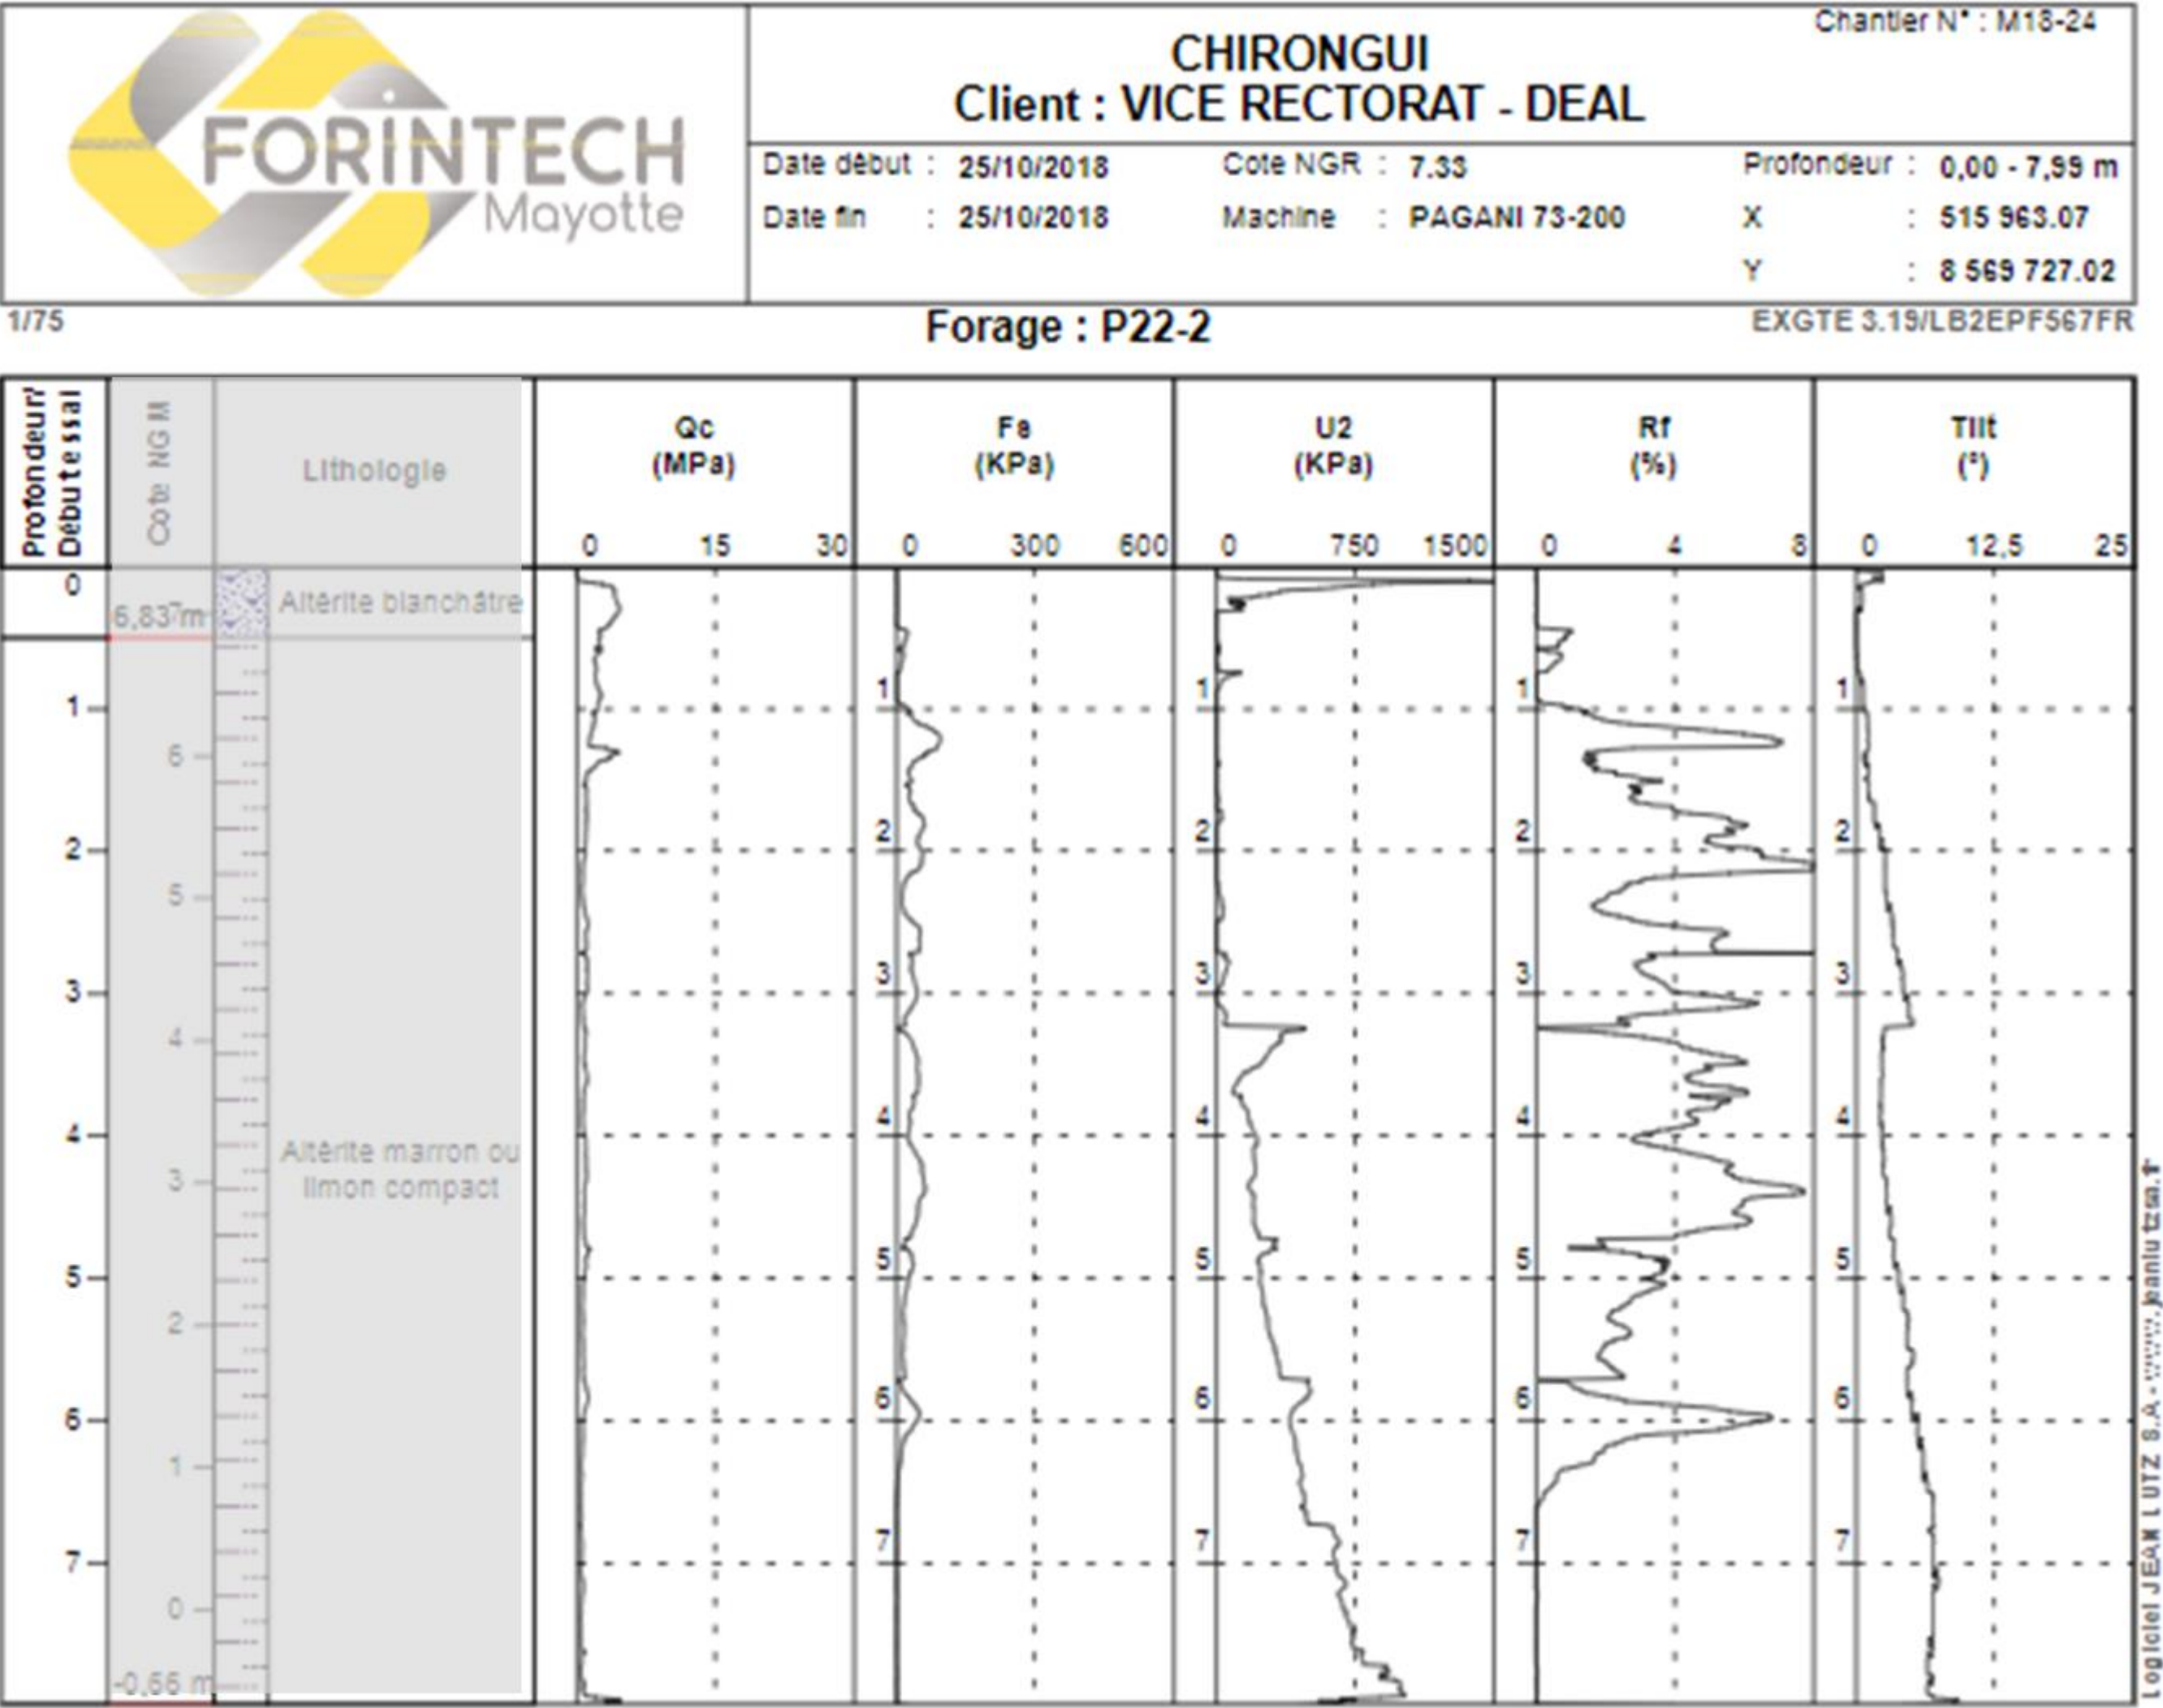

Datastreams

Application to some Geotech tests

- Three geotech in-situ tests
 - Cone Penetration Test (CPT)
 - Standard Penetration Test (SPT)
 - Menard Pressuremeter
- Measurements at regular depths along a borehole: BoreholePointFOI

CPT template

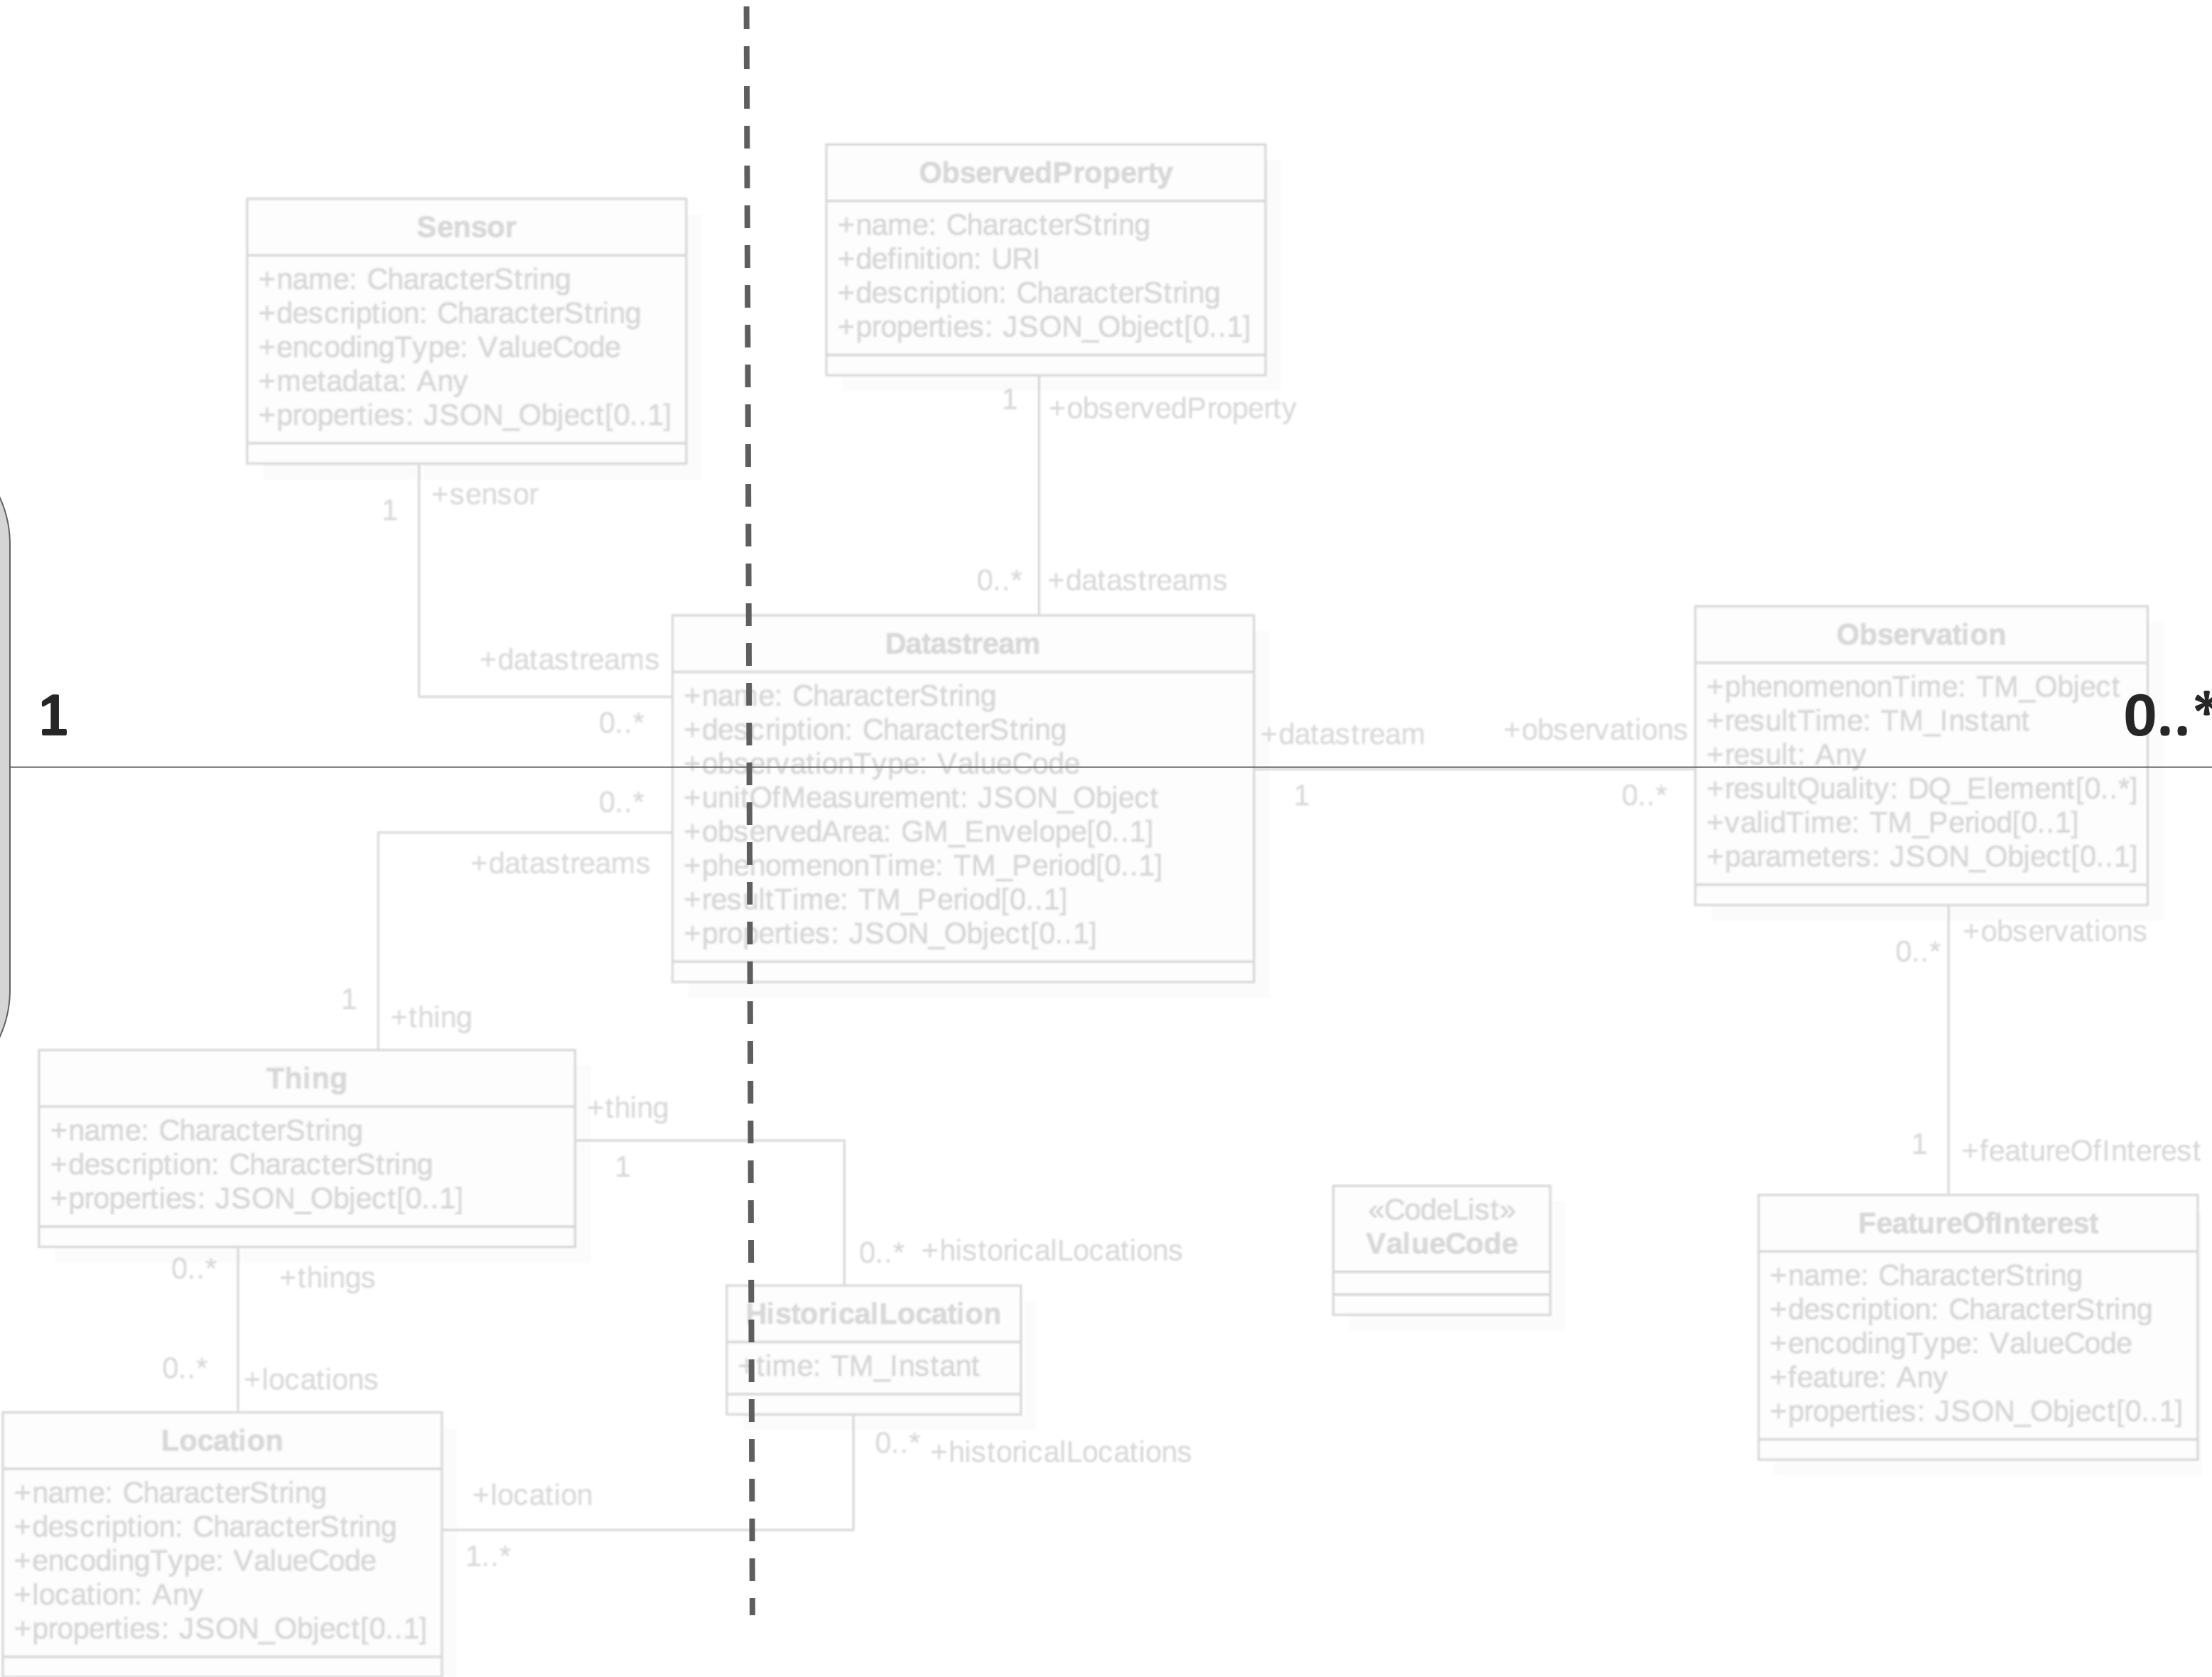

Logiciel JEAN LUTZ S.A. - www.jeanlutz.fr

- SensorType: CPT
- ObsProp:
 - Here Qc, Fs, U2, Rf, Tilt
 - Also possible : U1, U3, alpha, qt, ft, Rf, Rft, γ , σ_v , qn, Δu_2 , uo, Bq, Rfn
- Type of FOI:
 - BH_HolePointFOI

How to declare Geotech tests with STA?

Test description

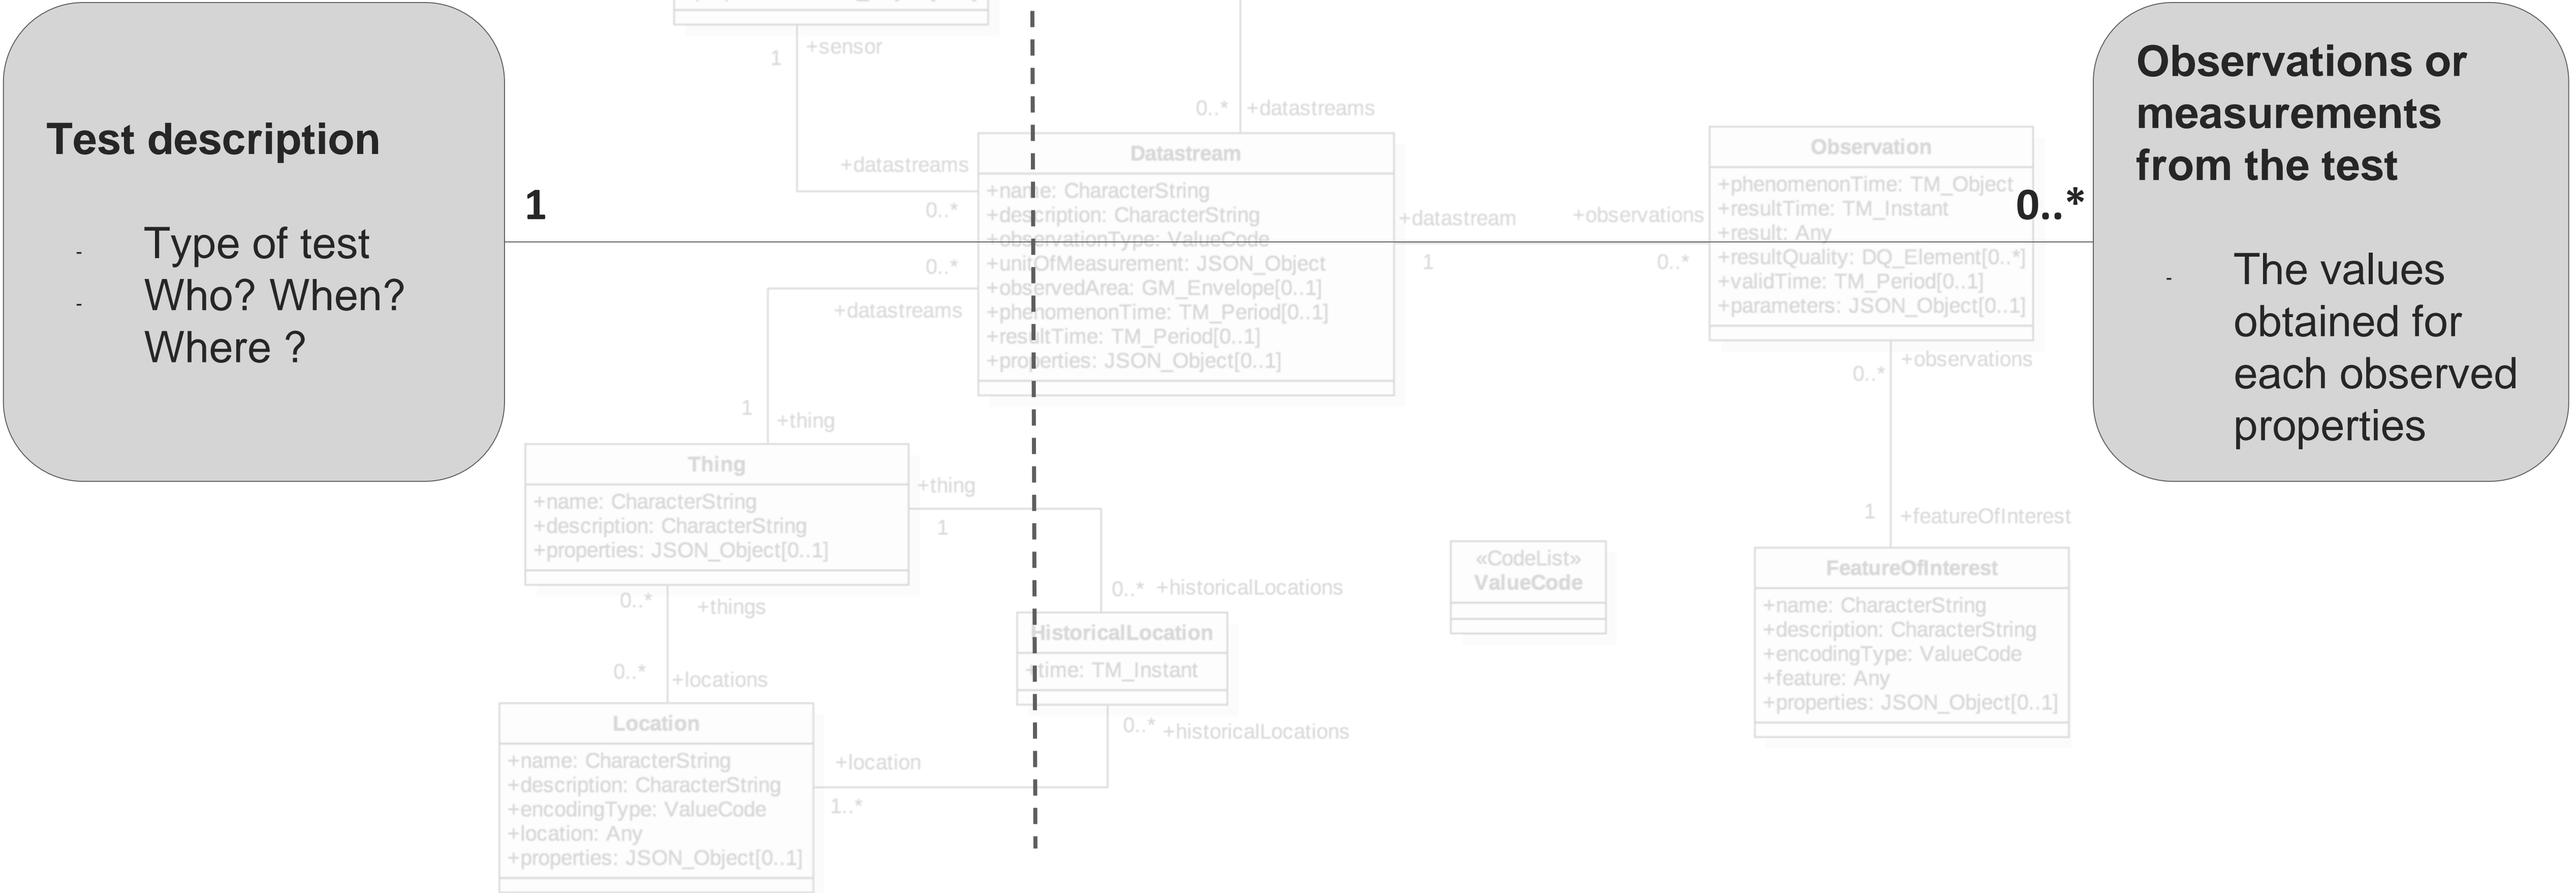

- Type of test
- Who? When? Where ?

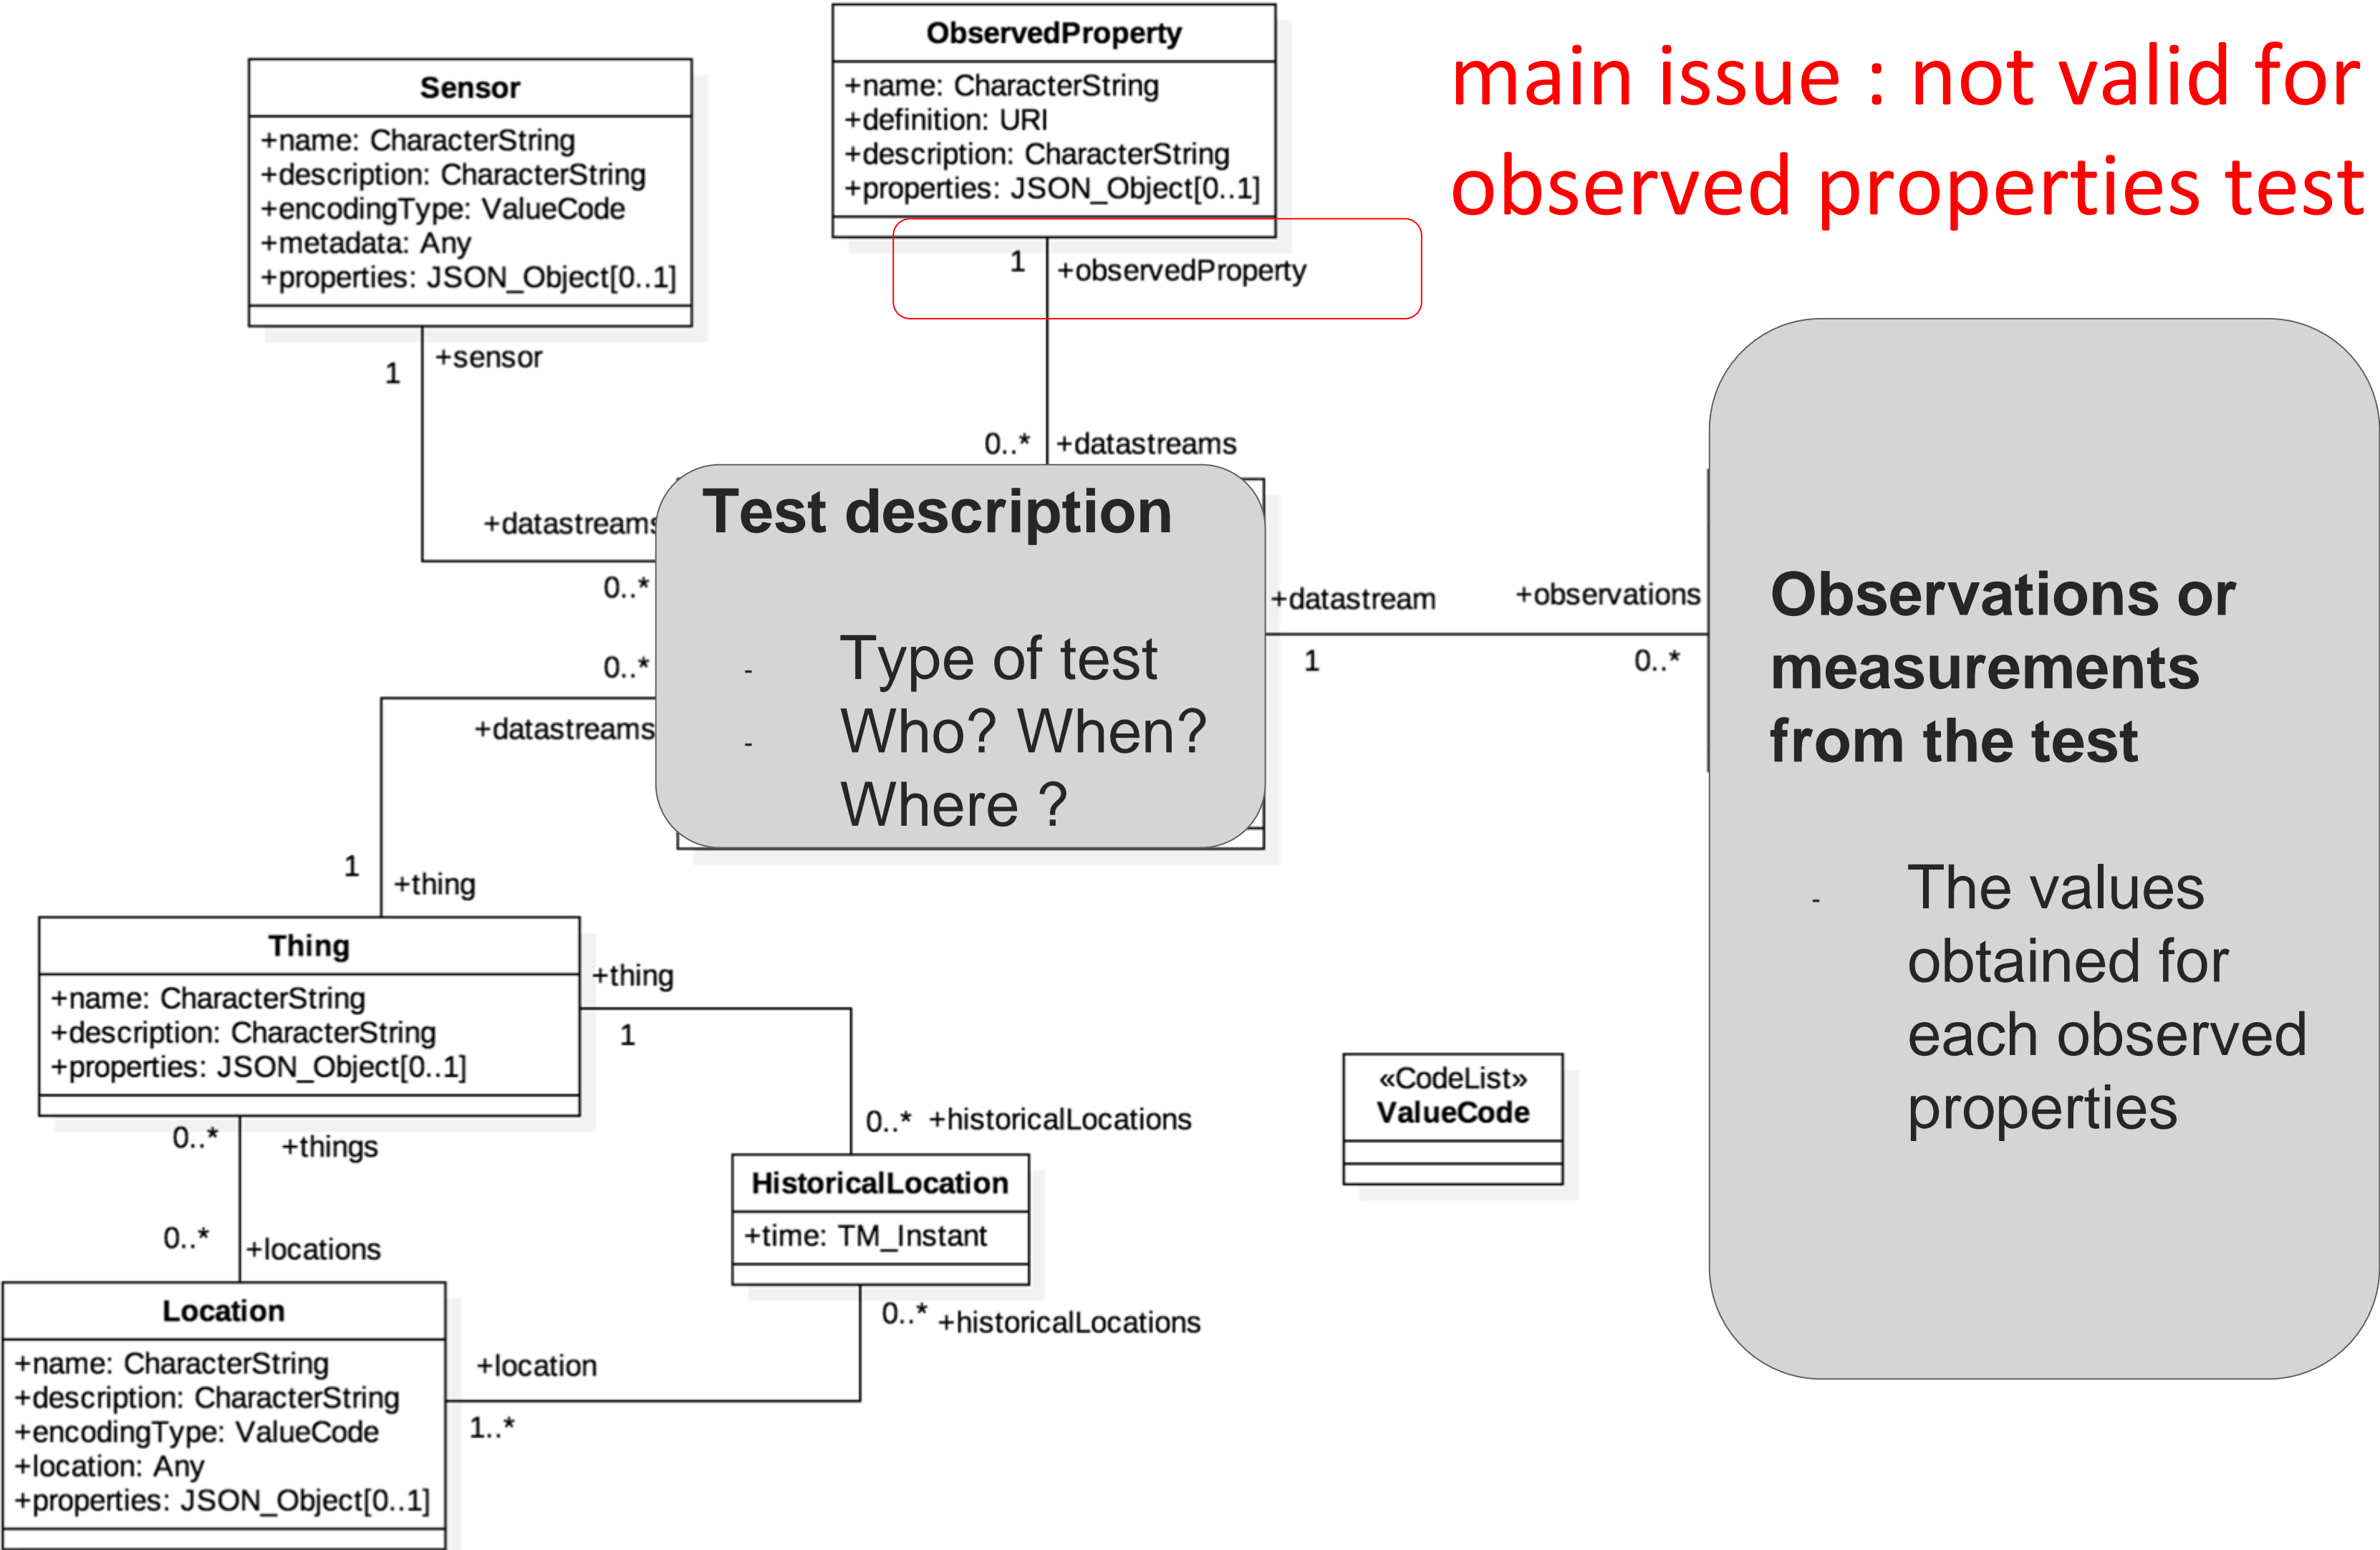

Observations or measurements from the test

- The values obtained for each observed properties

Classical geotech data provision

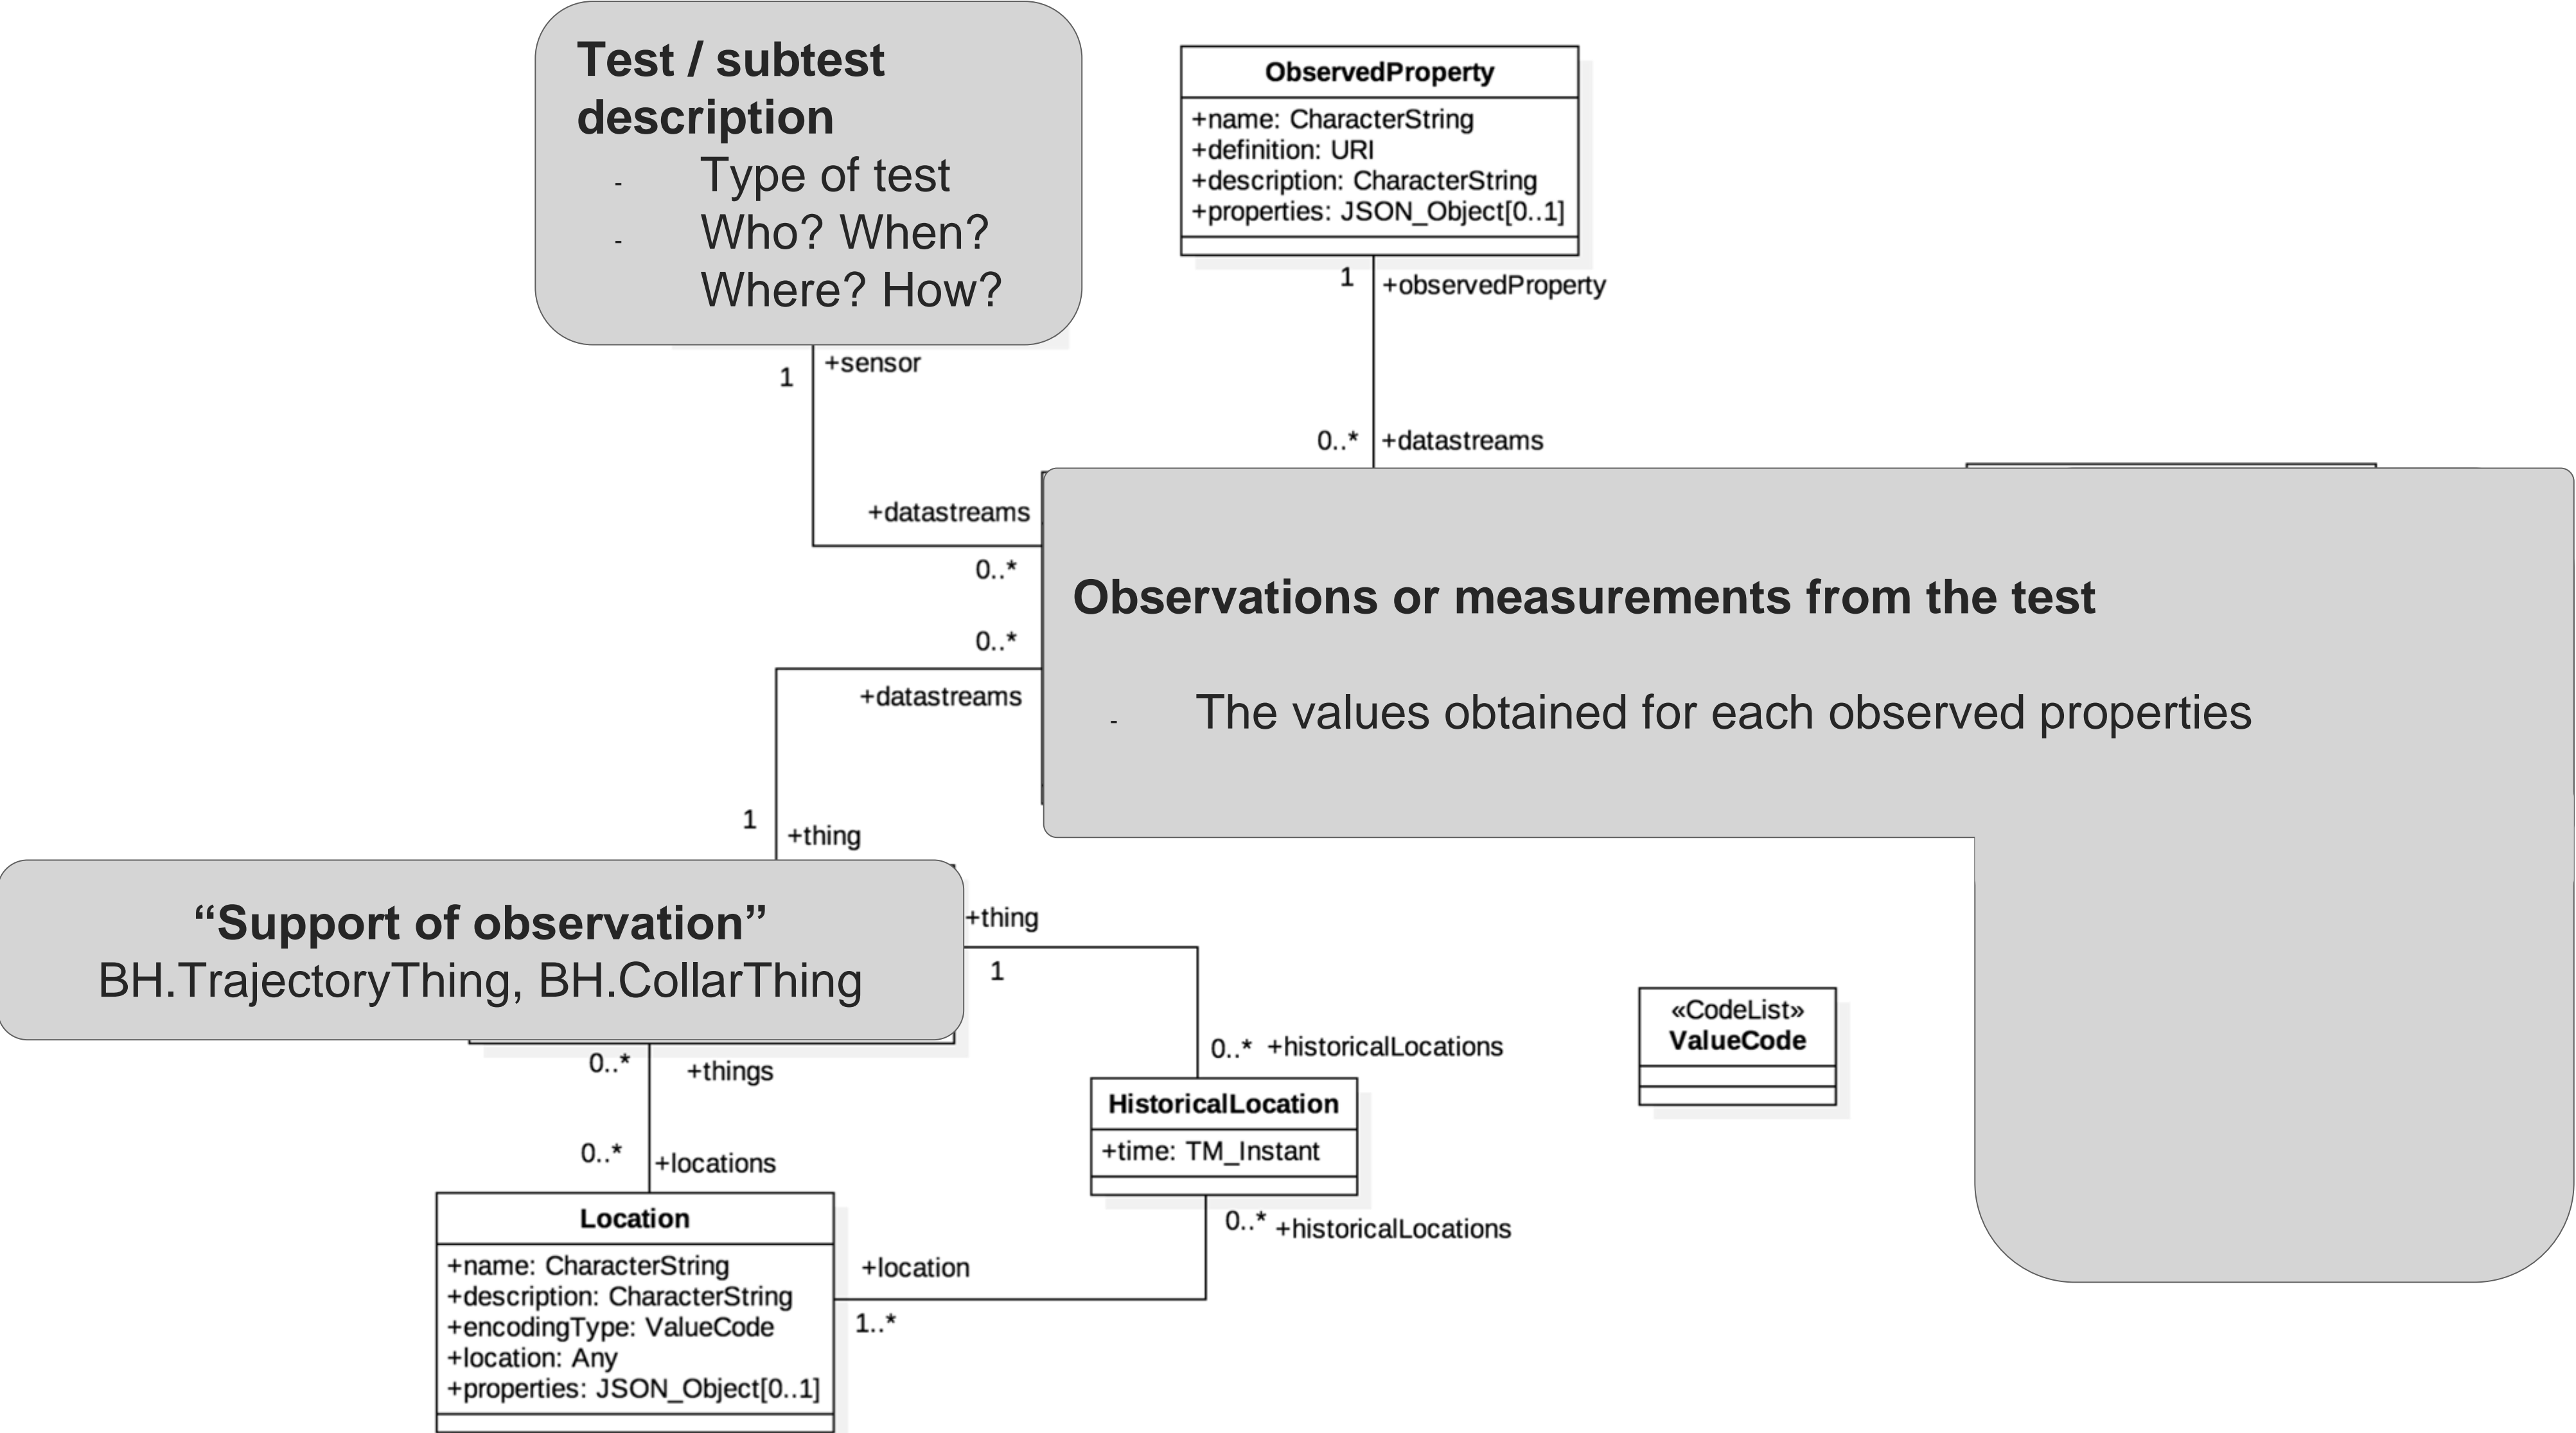

Option 1 : Test = DataStream

main issue : not valid for multi
observed properties test

Option 2 : Test = Sensor

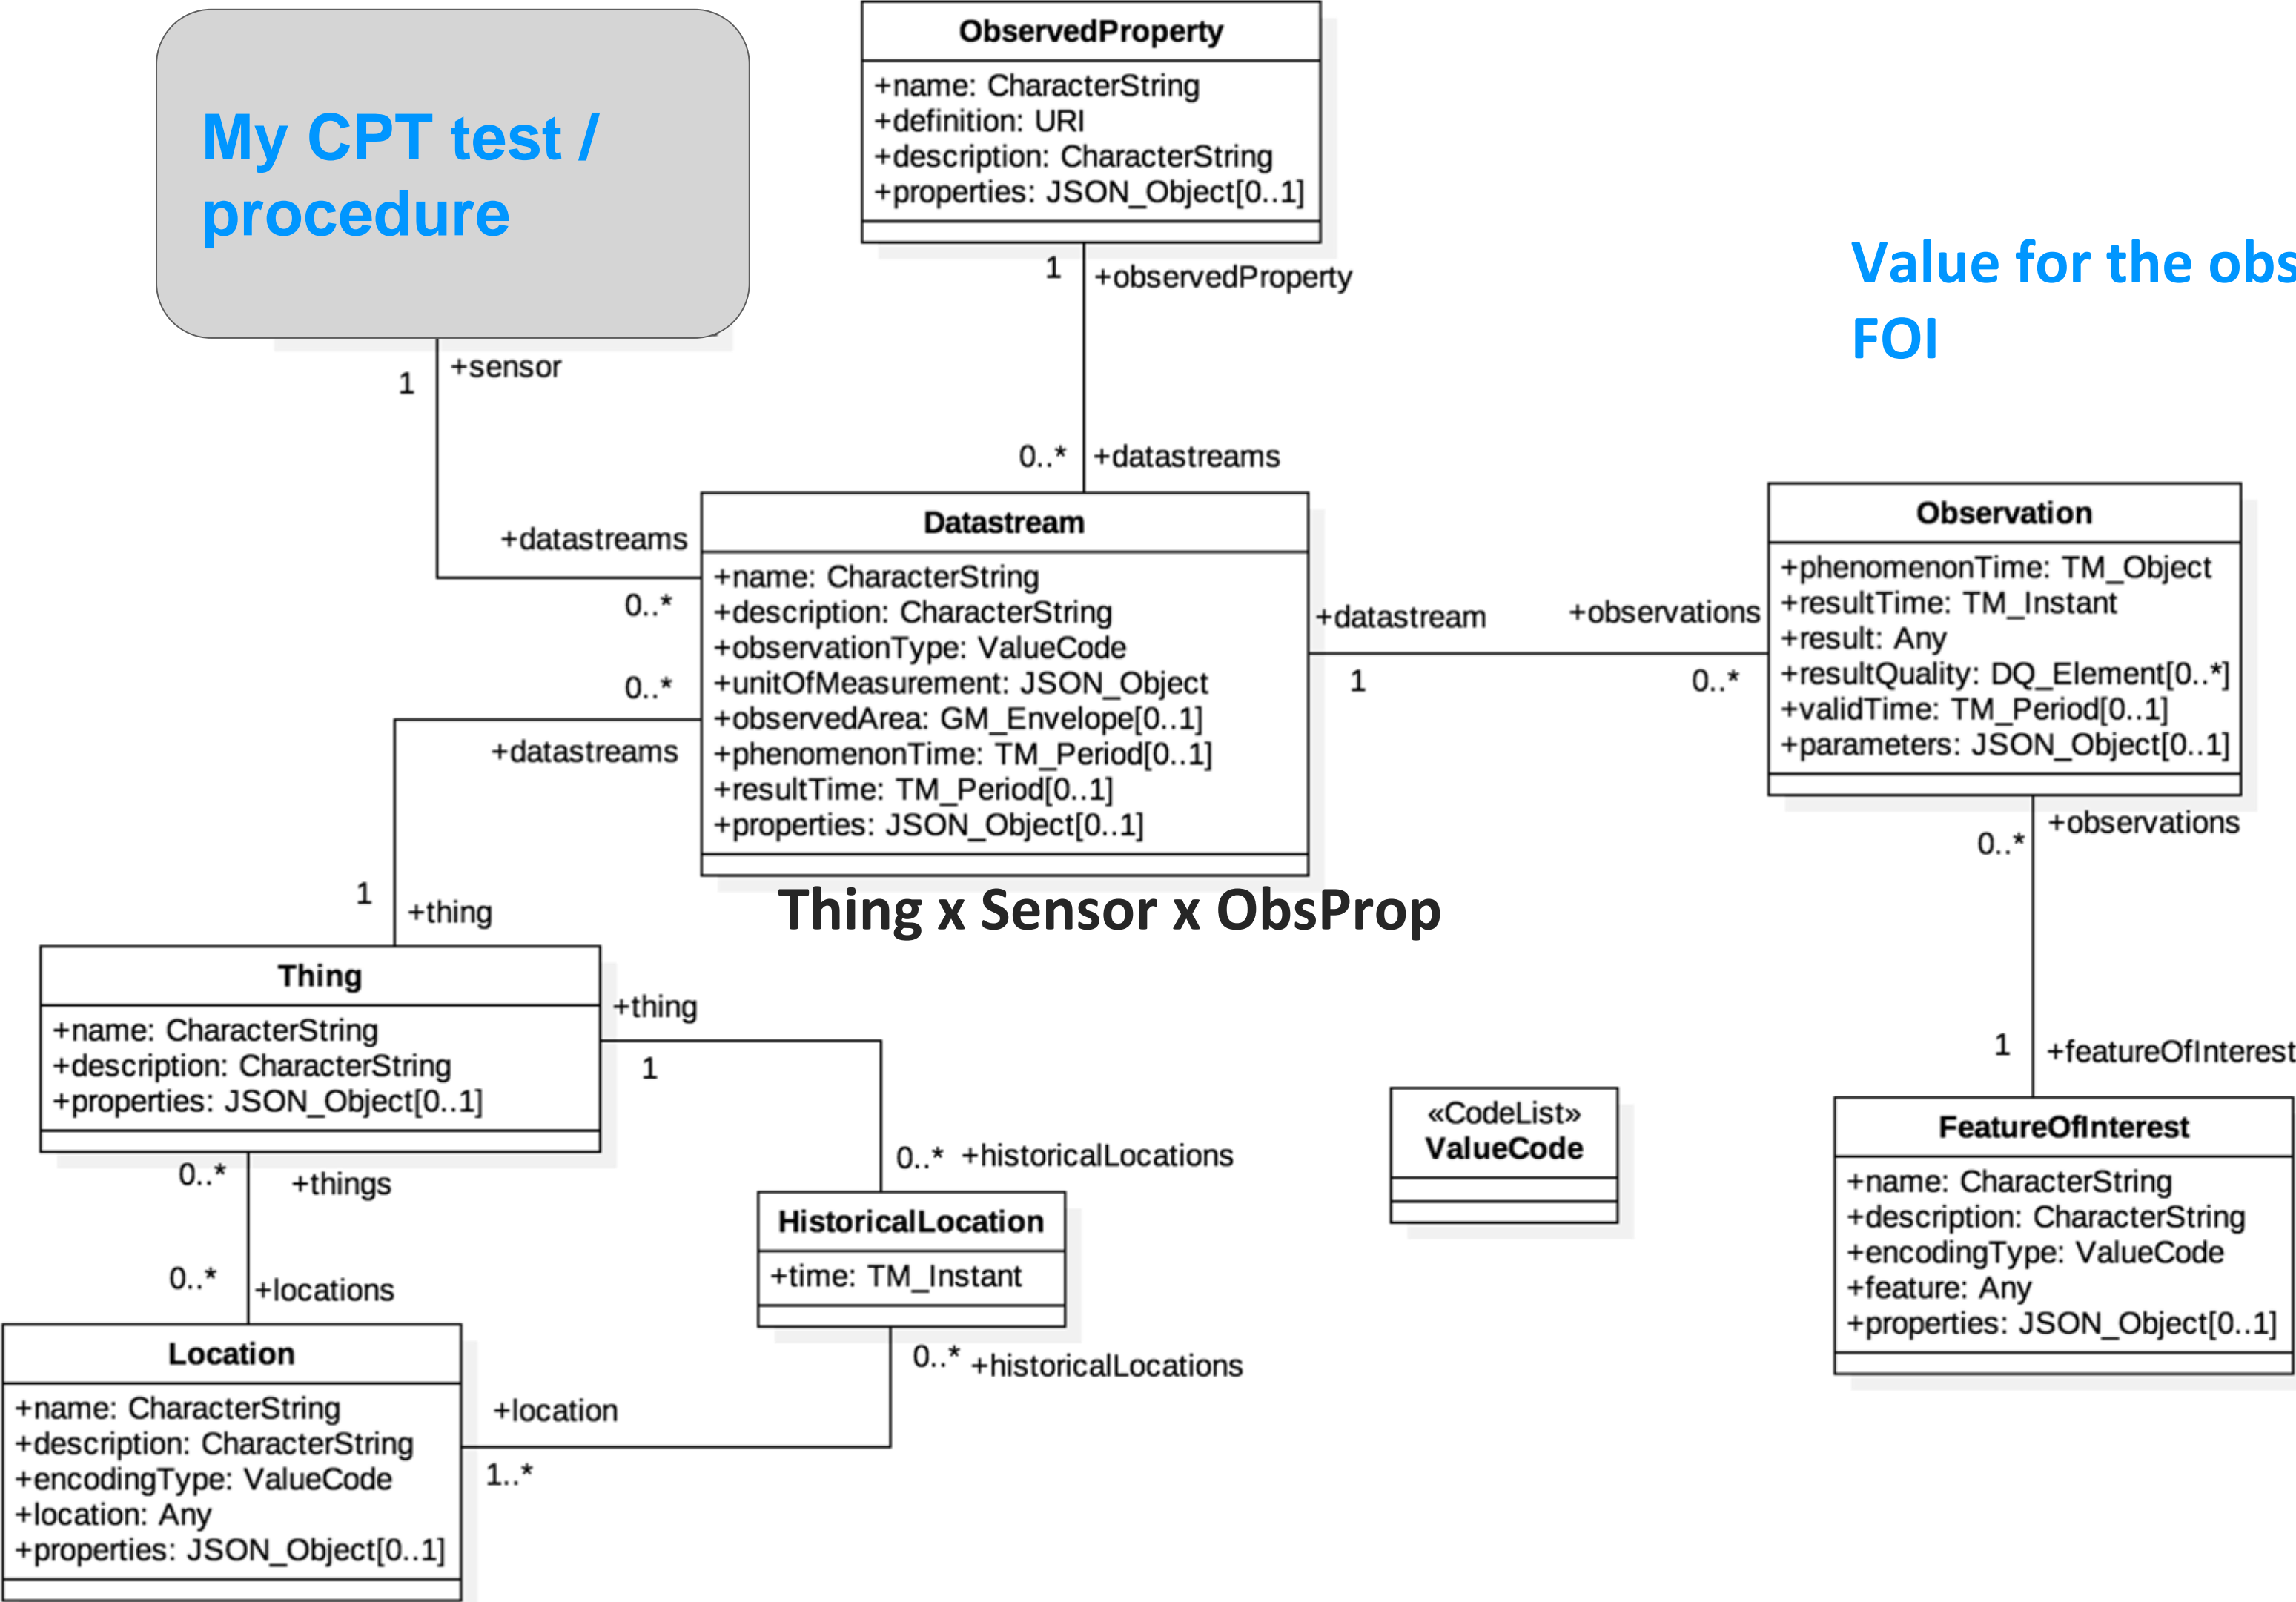

CPT design options 1: 1 procedure for CPT

/!\ Still one ObsProp per DataStream

qc, fs, u1, u2, u3, alpha, qt, ft, Rf, Rft, gamma, sigmav, qn, deltau2, uo, Bq, Rfn, U2Divqc, qc-u2, Dist

BHTrajectoryThing

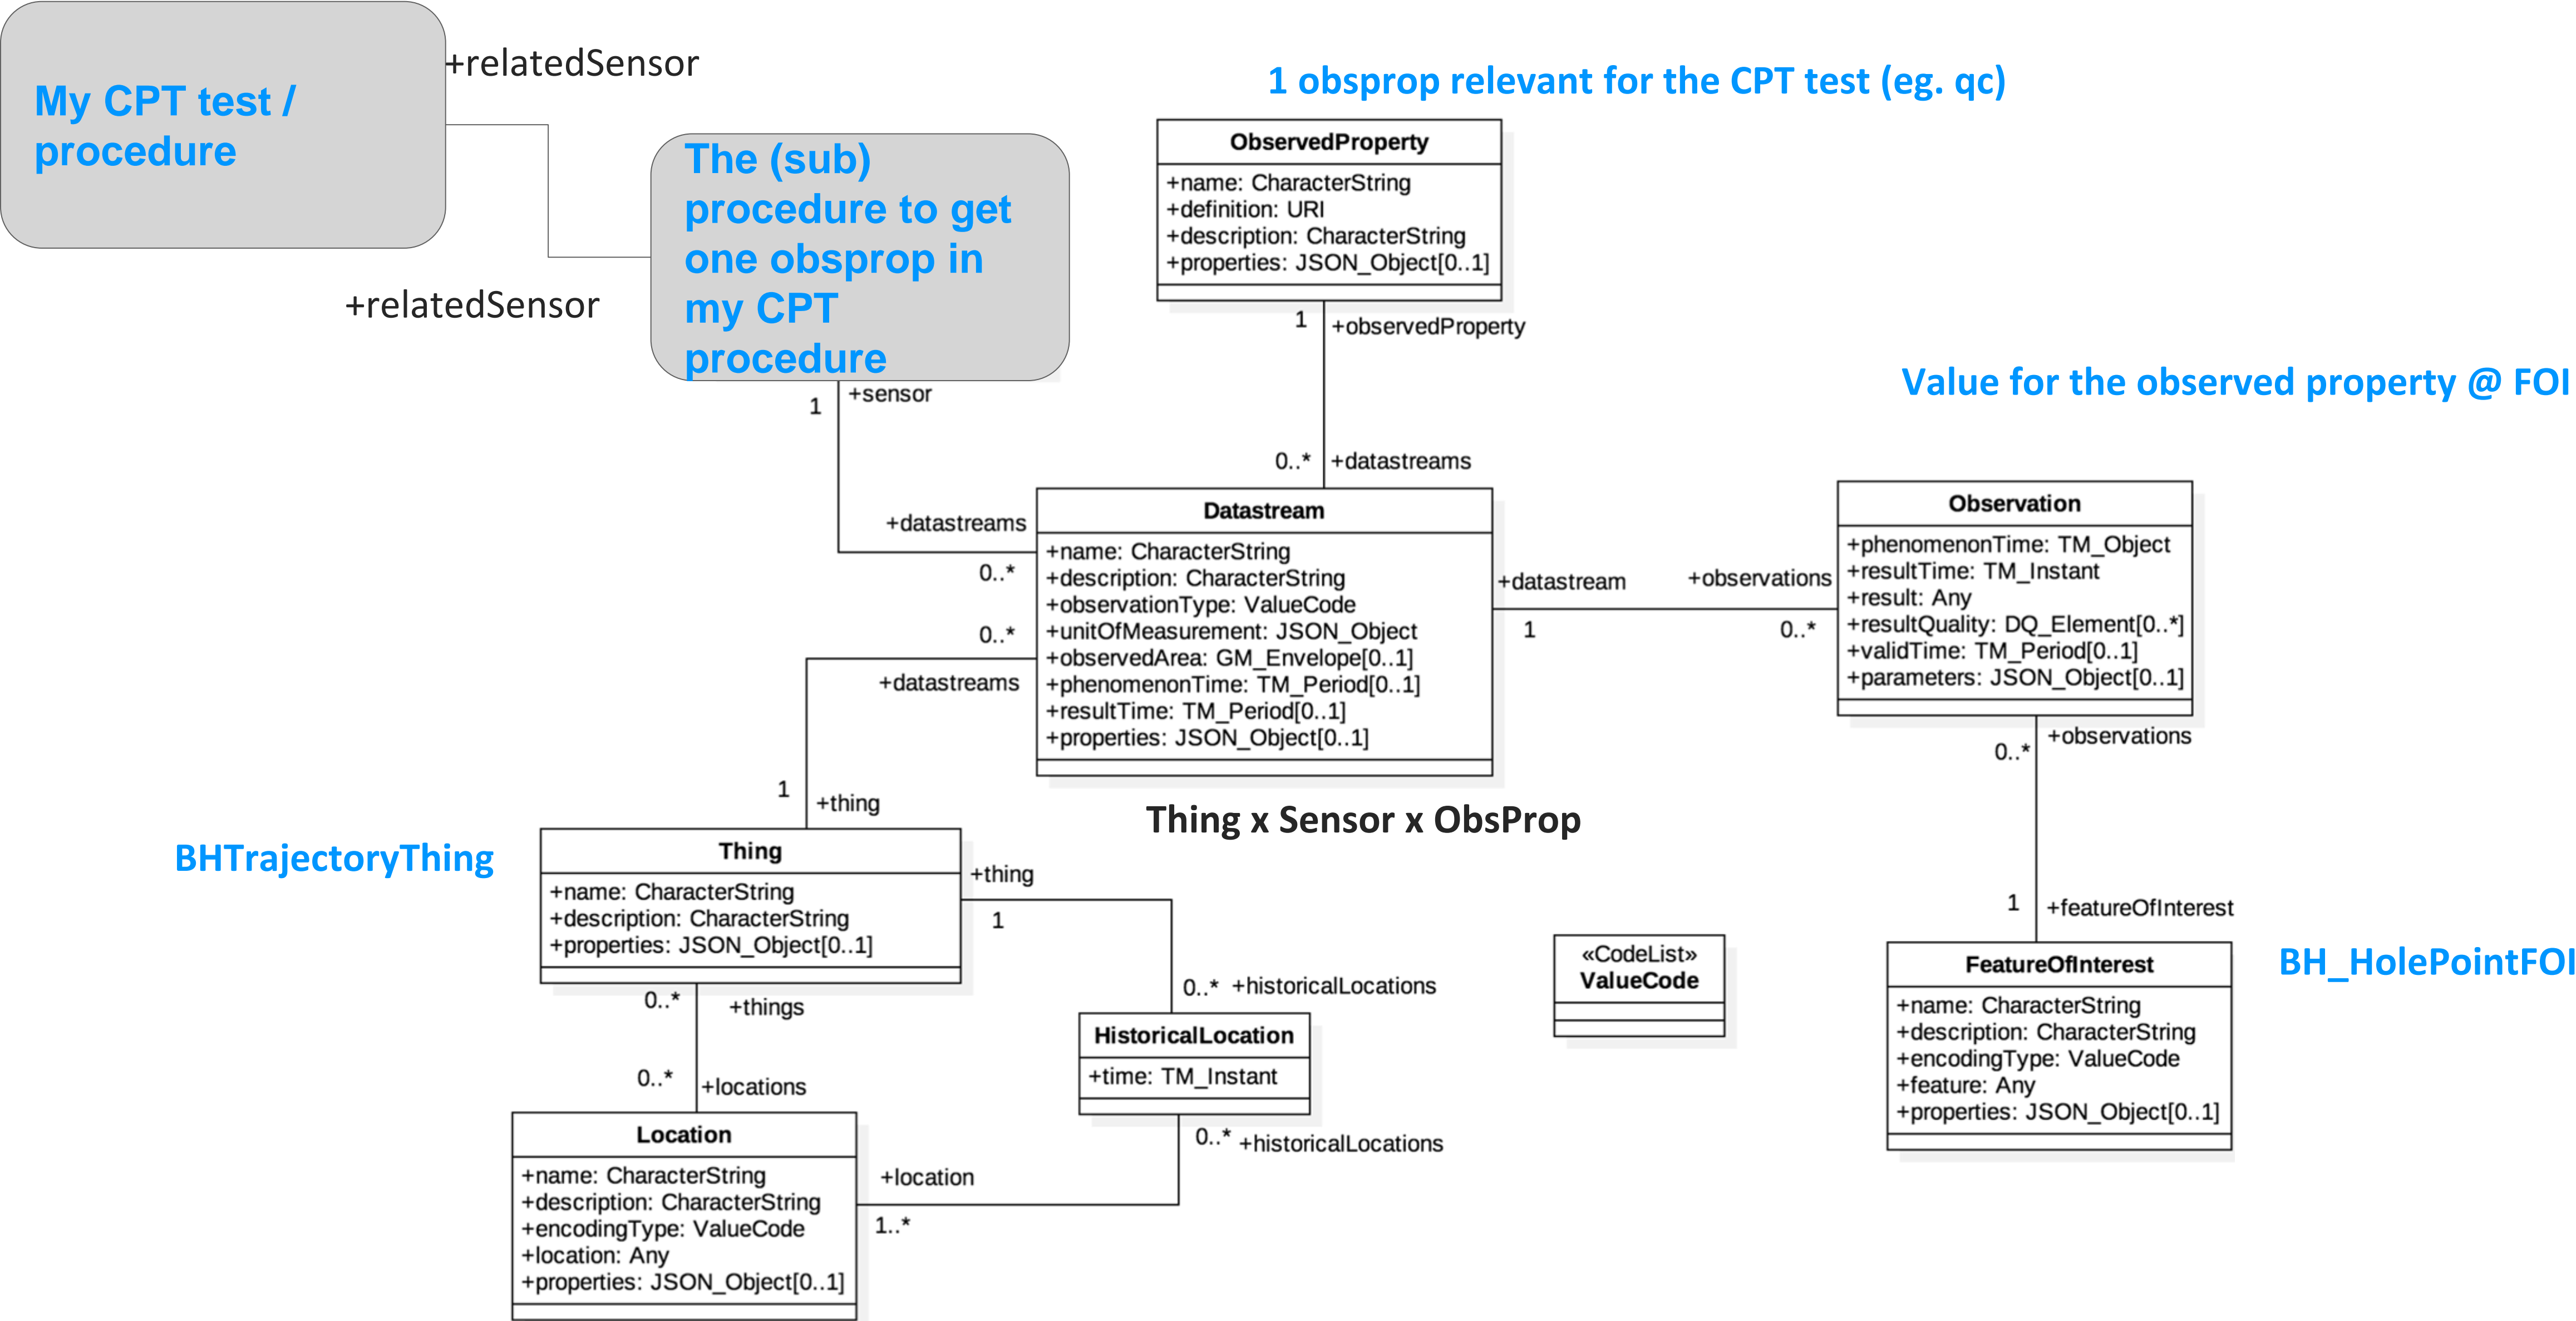

My CPT test / procedure

Value for the observed property @ FOI

Thing x Sensor x ObsProp

BH_HolePointFOI

CPT design option 2 : detailed procedure

Queries

Get a list of all the geotechTests in this STA (supposing the STA only contains Geotech tests) :

- [https://\[FrostGeotechServerAddress\]/v1.1/Sensors](https://[FrostGeotechServerAddress]/v1.1/Sensors)

Get a list of all the geotechTests that are of type CPT

- [https://\[FrostGeotechServerAddress\]/v1.1/Sensors](https://[FrostGeotechServerAddress]/v1.1/Sensors?$filter=sensortype%20eq%20%27https://data.geoscience.fr/ncl/Proc/86%27)?\$filter=sensortype eq
'<https://data.geoscience.fr/ncl/Proc/86>'

Get the description of one test by ID:

- [https://\[FrostGeotechServerAddress\]/v1.1/Sensors\(xxx\)](https://[FrostGeotechServerAddress]/v1.1/Sensors(xxx))

Queries

Get the list of the available DataStreams associated to my Geotechtest

- [https://\[FrostGeotechServerAddress\]/v1.1/Sensors\(xxx\)/Datastreams](https://[FrostGeotechServerAddress]/v1.1/Sensors(xxx)/Datastreams)

Get the description of one DataStream associated to my Geotechtest

- [https://\[FrostGeotechServerAddress\]/v1.1/Datastreams\(yyy\)](https://[FrostGeotechServerAddress]/v1.1/Datastreams(yyy))

Get the observations from this DataStream

- [https://\[FrostGeotechServerAddress\]/v1.1/Datastreams\(yyy\)/Observations](https://[FrostGeotechServerAddress]/v1.1/Datastreams(yyy)/Observations)

Other ideas?

Discussion

Other queries?

Mapping for SPT

- SensorType: SPT
- ObsProp:
 - N, InsertionDepth
- Type of FOI:
 - BH_HolePointFOI

No, N1, N2, N, insertionDepth

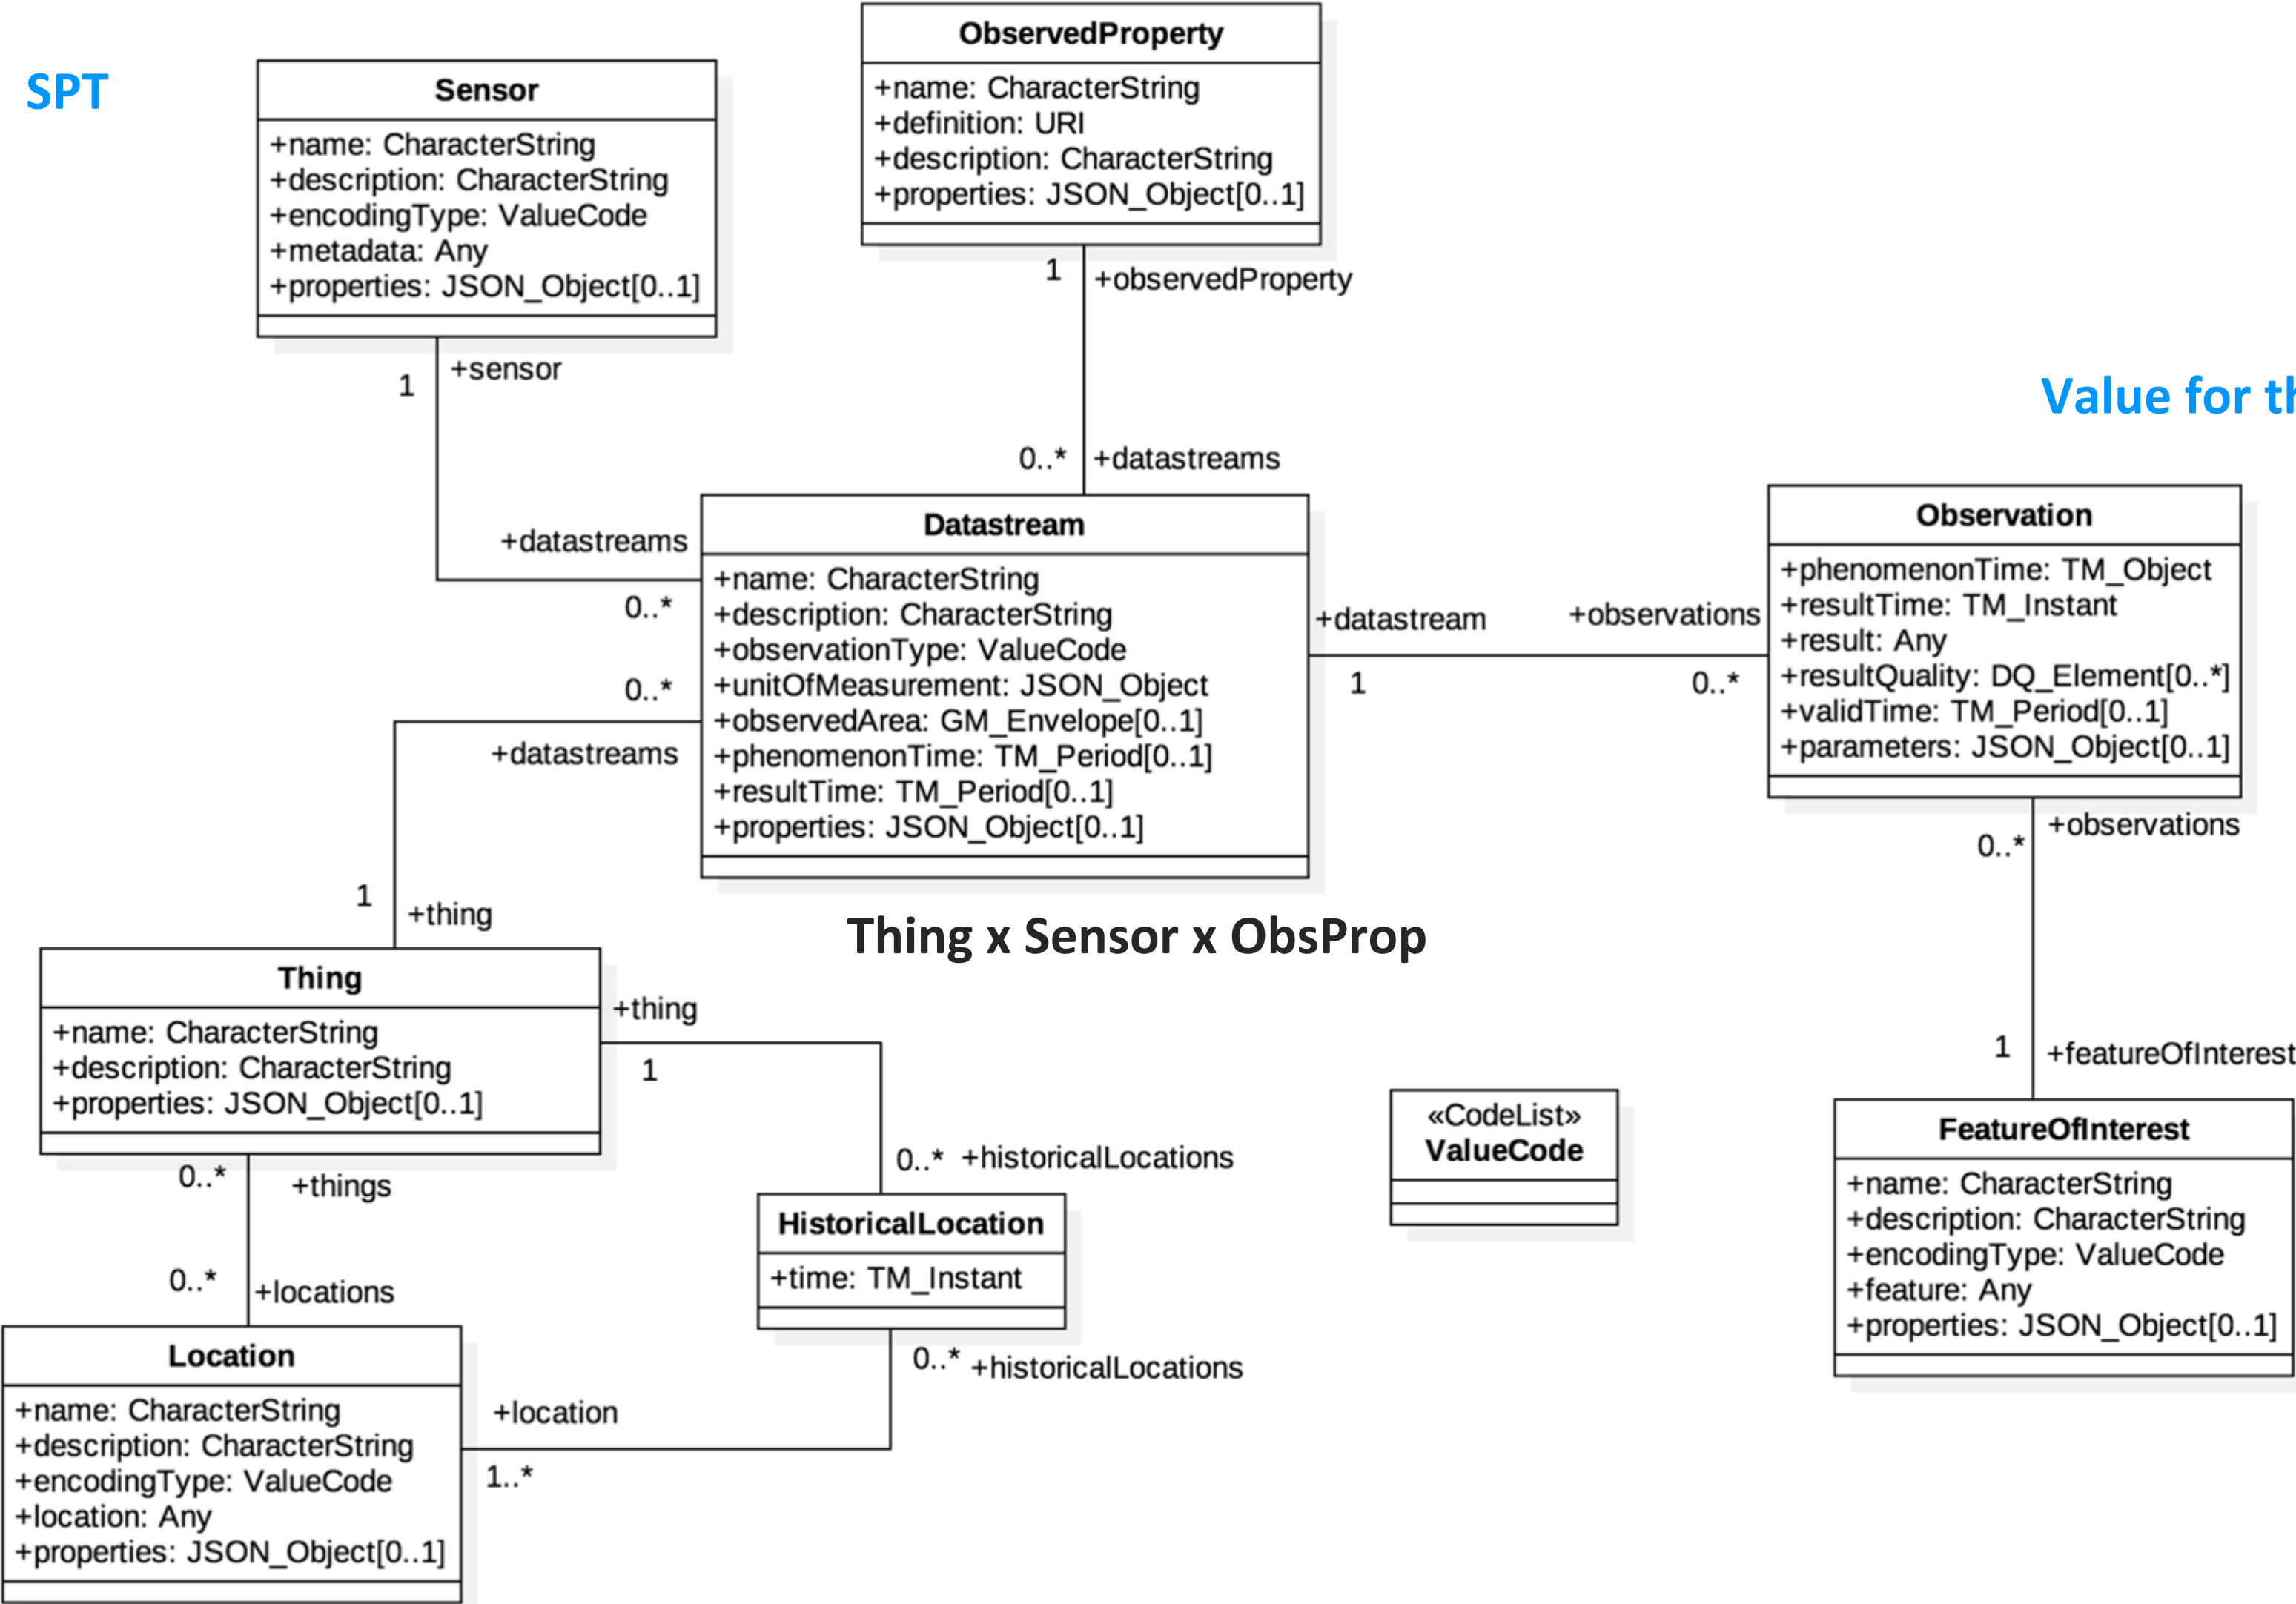

SPT

Value for the observed property @ FOI

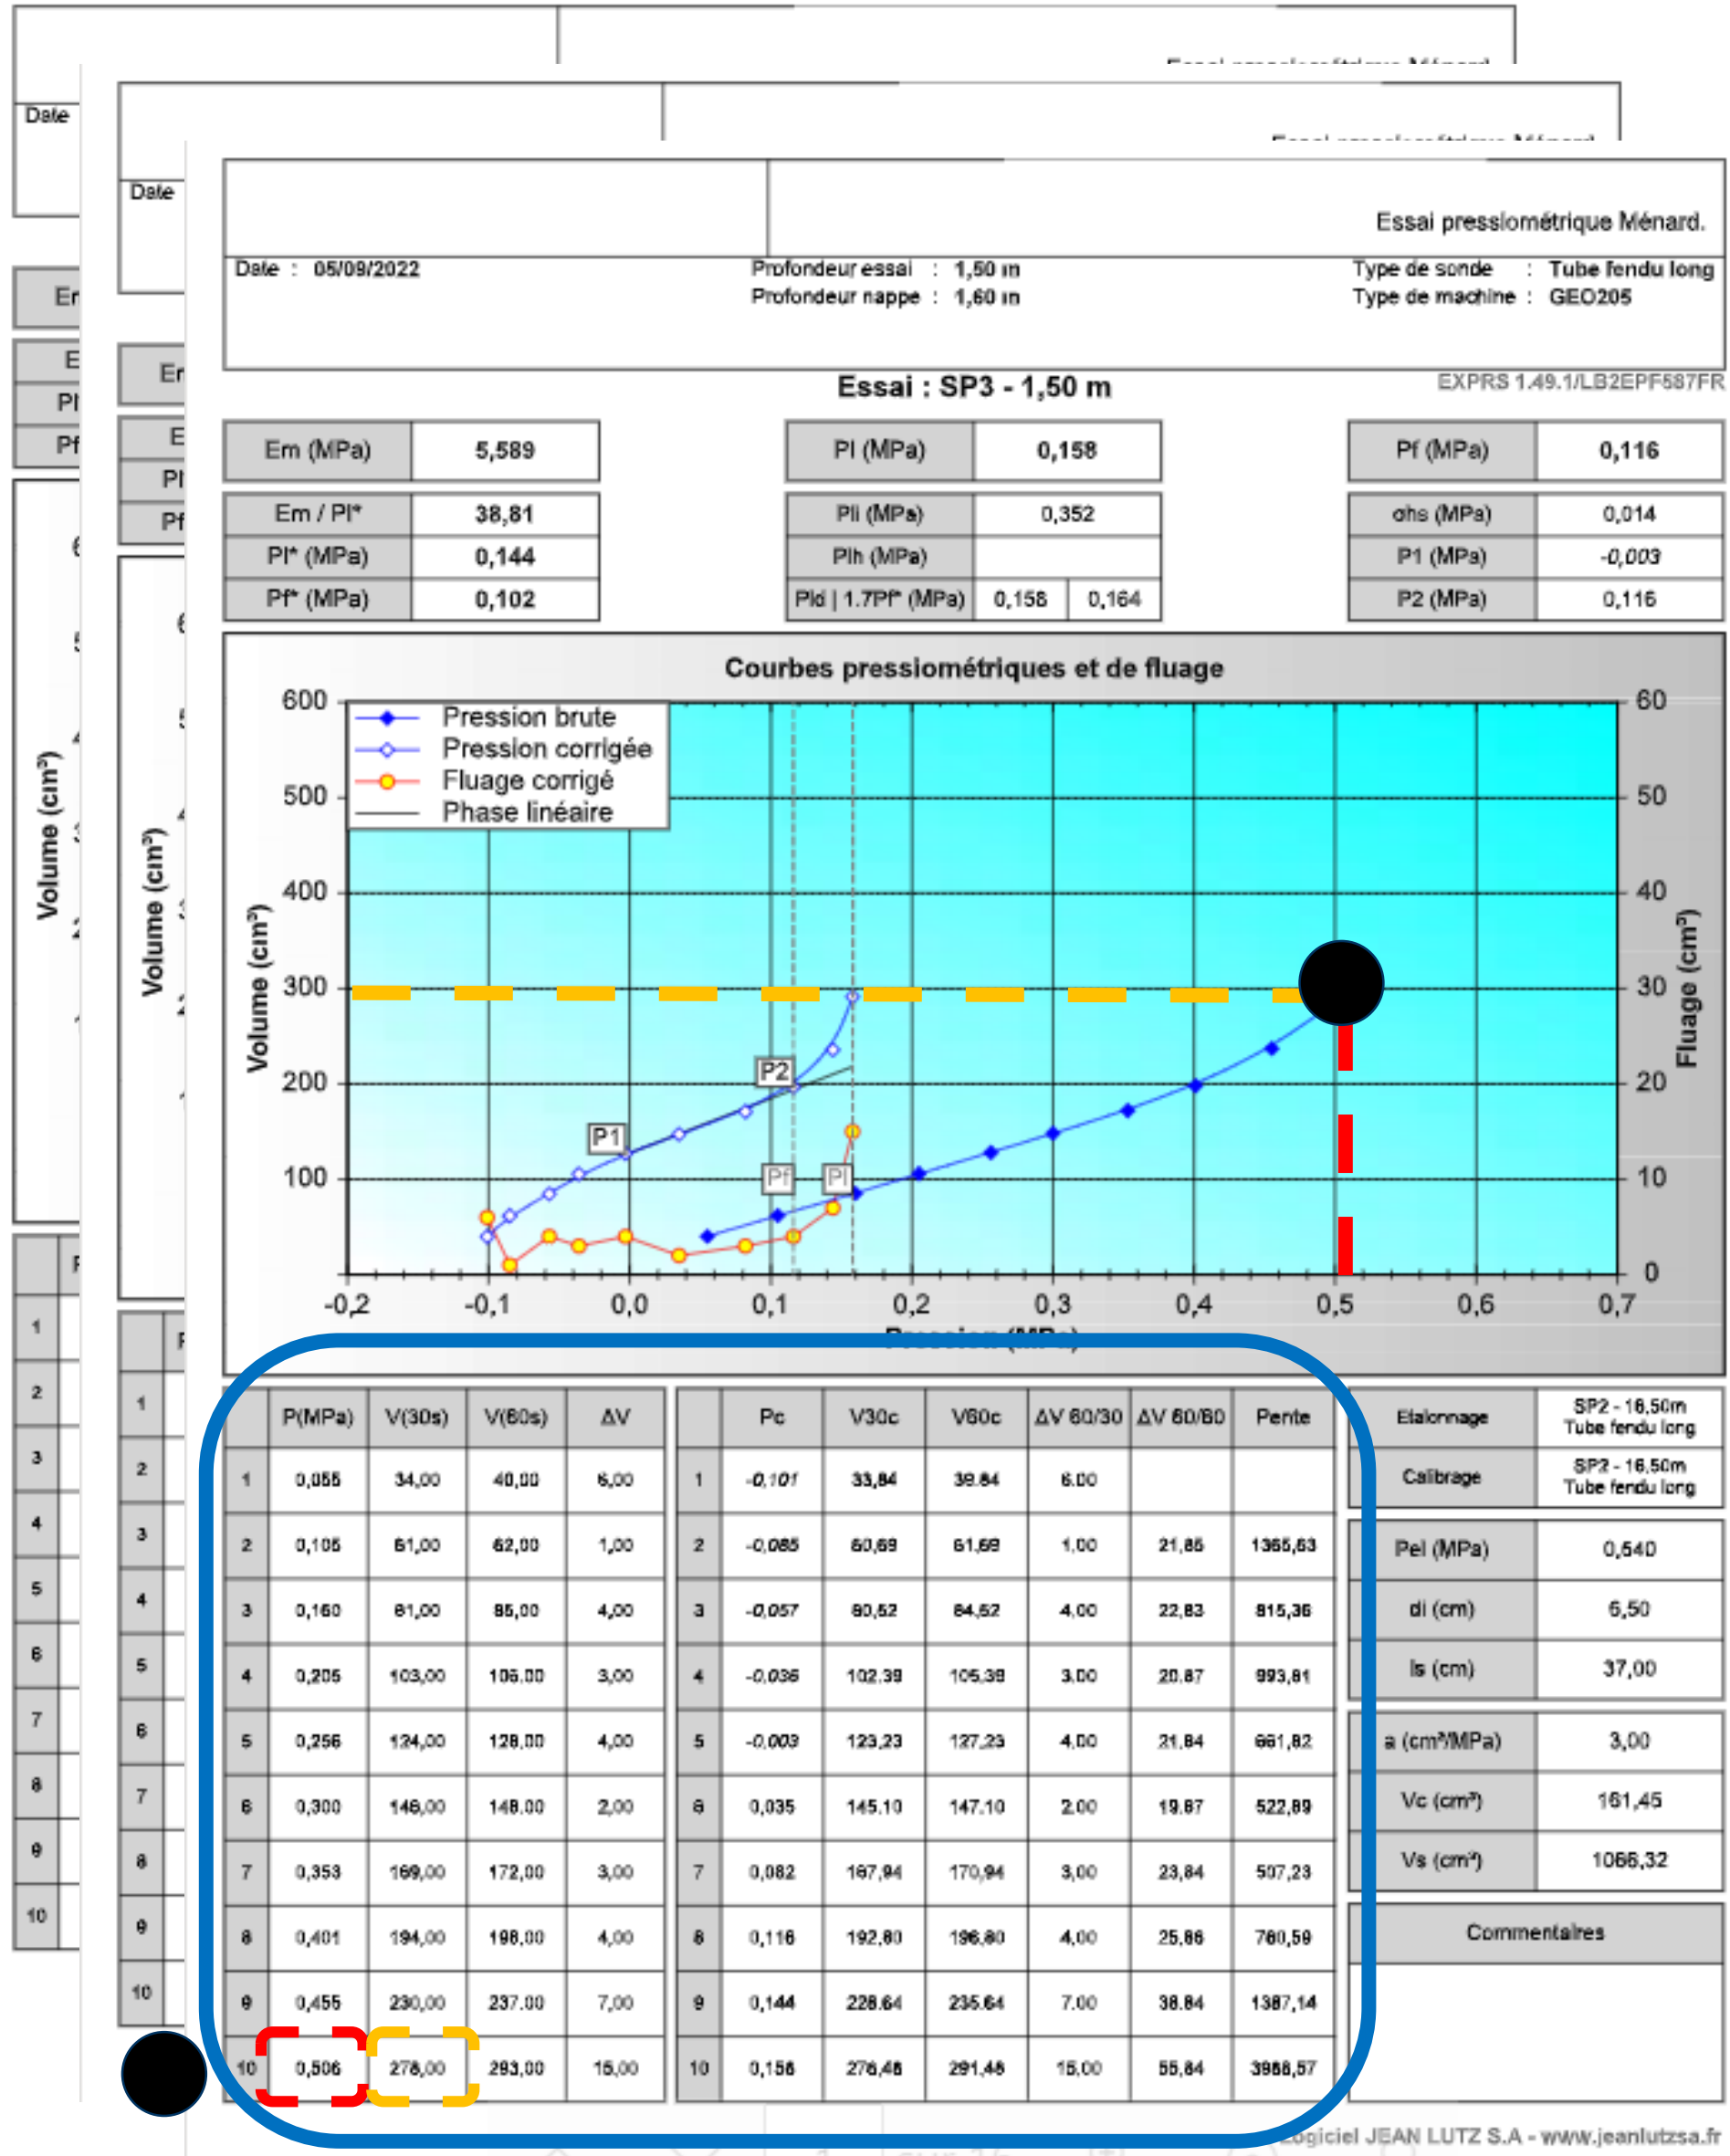

BHTrajectoryThing

Thing x Sensor x ObsProp

BH_HolePointFOI

Mapping for Menard Pressuremeter

- SensorType:
 - Menard Pressuremeter
- ObsProp:
 - Pr1, Pr15, Pr30, Pr60, Vr1, Vr15, Vr30, Vr60, P, V, mi, DeltaV(60-30)
- Type of FOI:
 - BH_HolePointFOI
- How to deal with the different pressure steps?
 - Option 1: different Time Instants
 - Option 2: as parameter

Menard Pressuremeter

Pr1, Pr15, Pr30, Pr60, Vr1, Vr15, Vr30, Vr60, P, V, mi, DeltaV(60-30)

Pressio @ FOI

Value for the observed property @ « Step »

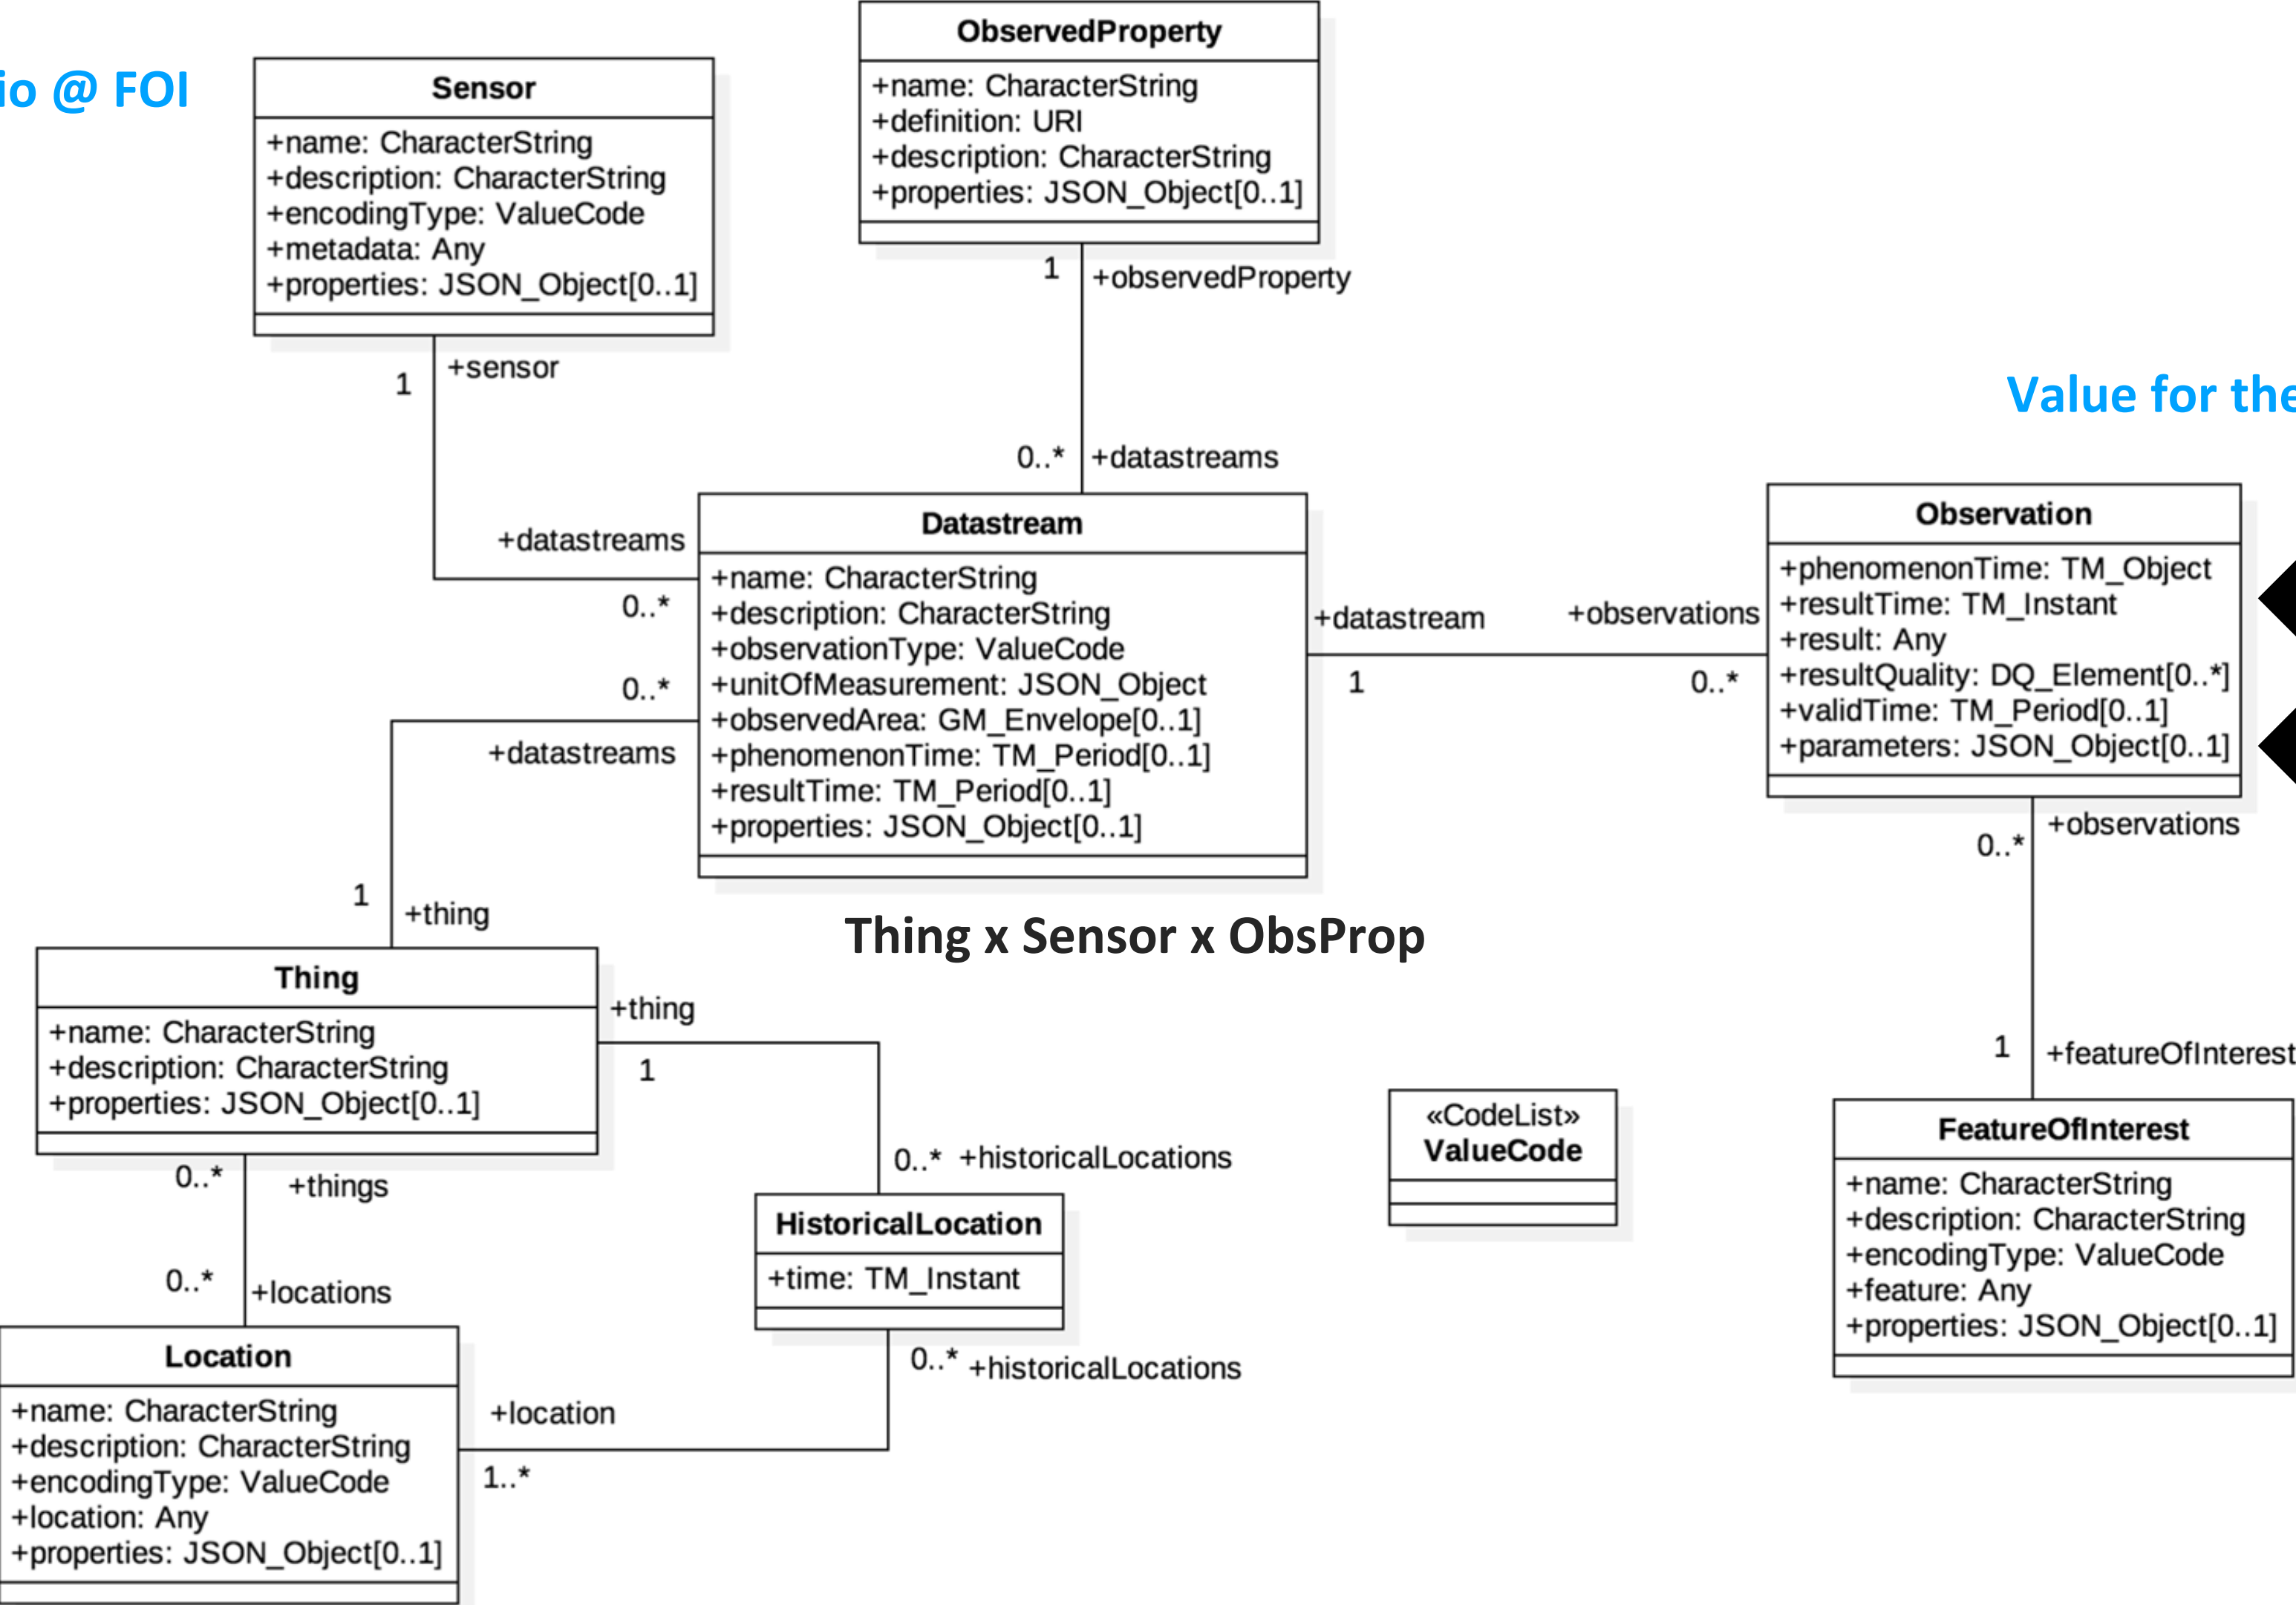

Option 1:
with different Time Instants

Option 2: as parameter

BHTrajectoryThing

Thing x Sensor x ObsProp

BH_HolePointFOI

Discussion

Atterberg Limits test

- Let's talk about MaterialSamples / Specimen

News from ISSMGE TC222

- Discussion to have a workshop dedicated to BIM and Digital Twins for Geotech
